MedBiquitous Consortium XML Public License and Terms of Use

MedBiquitous XML (including schemas, specifications, sample documents, Web services description files, and related items) is provided by the copyright holders under the following license. By obtaining, using, and or copying this work, you (the licensee) agree that you have read, understood, and will comply with the following terms and conditions.

The Consortium hereby grants a perpetual, non-exclusive, non-transferable, license to copy, use, display, perform, modify, make derivative works of, and develop the MedBiquitous XML for any use and without any fee or royalty, provided that you include the following on ALL copies of the MedBiquitous XML or portions thereof, including modifications, that you make.

1. Any pre-existing intellectual property disclaimers, notices, or terms and conditions. If none exist, the following notice should be used: "Copyright © [date of XML release] MedBiquitous Consortium. All Rights Reserved. <http://www.medbiq.org>"
2. Notice of any changes or modification to the MedBiquitous XML files.
3. Notice that any user is bound by the terms of this license and reference to the full text of this license in a location viewable to users of the redistributed or derivative work.

In the event that the licensee modifies any part of the MedBiquitous XML, it will not then represent to the public, through any act or omission, that the resulting modification is an official specification of the MedBiquitous Consortium unless and until such modification is officially adopted.

THE CONSORTIUM MAKES NO WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, WITH RESPECT TO ANY COMPUTER CODE, INCLUDING SCHEMAS, SPECIFICATIONS, SAMPLE DOCUMENTS, WEB SERVICES DESCRIPTION FILES, AND RELATED ITEMS. WITHOUT LIMITING THE FOREGOING, THE CONSORTIUM DISCLAIMS ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE AND ANY WARRANTY, EXPRESS OR IMPLIED, AGAINST INFRINGEMENT BY THE MEDBIQUITOUS XML OF ANY THIRD PARTY PATENTS, TRADEMARKS, COPYRIGHTS OR OTHER RIGHTS. THE LICENSEE AGREES THAT ALL COMPUTER CODES OR RELATED ITEMS PROVIDED SHALL BE ACCEPTED BY LICENSEE "AS IS". THUS, THE ENTIRE RISK OF NON-PERFORMANCE OF THE MEDBIQUITOUS XML RESTS WITH THE LICENSEE WHO SHALL BEAR ALL COSTS OF ANY SERVICE, REPAIR OR CORRECTION.

IN NO EVENT SHALL THE CONSORTIUM OR ITS MEMBERS BE LIABLE TO THE LICENSEE OR ANY OTHER USER FOR DAMAGES OF ANY NATURE, INCLUDING, WITHOUT LIMITATION, ANY GENERAL, DIRECT, INDIRECT, INCIDENTAL, CONSEQUENTIAL, OR SPECIAL DAMAGES, INCLUDING LOST PROFITS, ARISING OUT OF ANY USE OF MEDBIQUITOUS XML.

LICENSEE SHALL INDEMNIFY THE CONSORTIUM AND EACH OF ITS MEMBERS FROM ANY LOSS, CLAIM, DAMAGE OR LIABILITY (INCLUDING, WITHOUT LIMITATION, PAYMENT OF ATTORNEYS' FEES AND COURT COSTS) ARISING OUT OF MODIFICATION OR USE OF THE MEDBIQUITOUS XML OR ANY RELATED CONTENT OR MATERIAL BY LICENSEE.

LICENSEE SHALL NOT OBTAIN OR ATTEMPT TO OBTAIN ANY PATENTS, COPYRIGHTS OR OTHER PROPRIETARY RIGHTS WITH RESPECT TO THE MEDBIQUITOUS XML.

THIS LICENSE SHALL TERMINATE AUTOMATICALLY IF LICENSEE VIOLATES ANY OF ITS TERMS AND CONDITIONS.

The name and trademarks of the MedBiquitous Consortium and its members may NOT be used in advertising or publicity pertaining to MedBiquitous XML without specific, prior written permission. Title to copyright in MedBiquitous XML and any associated documentation will at all times remain with the copyright holders.

- Deborah Whippen, American Society for Clinical Oncology

Joel Farrell, IBM, Chair of the MedBiquitous Consortium Technical Steering Committee, and Scott Hinkelman, IBM, Web Services Technology Architect for the MedBiquitous Consortium

have contributed their expertise to ensure that this specification is well-designed and interoperable with related industry standards.

Extensible Customer Information Language was reviewed in the creation of this schema. For more information, see: <http://www.oasis-open.org/committees/ciq/ciq.html#7>.

Introduction

This document describes the MedBiquitous Healthcare Professional Profile XML Schema in detail. It is intended for use by any one who wants to create, implement, or create interoperable tools for XML profiles based on this specification. The status of the document is indicated at the bottom of the page; draft documents are subject to review and approval through the MedBiquitous Standards Program Operating Procedures (see http://www.medbiq.org/working_groups/consortium_process/MedBiquitousANSIProcess.pdf).

The objective of this Healthcare Professional Profile Schema is to provide a data structure that allows one to represent one or more healthcare professionals or members of professional medical societies in a standard format. This structure then enables the exchange of profile information between related business systems and over the Web.

The MedBiquitous Consortium is charged with creating an XML framework for professional medical societies that will enable them to collaborate to advance medical education and professional competence assessment. Societies are based on the concept of membership; it touches every aspect of their business. Societies often exchange member information with third-party vendors and publishers. In addition, many certifying and licensing boards need to communicate clinician profile information with their umbrella entities or partner organizations. The Professional Profile facilitates these transactions as well.

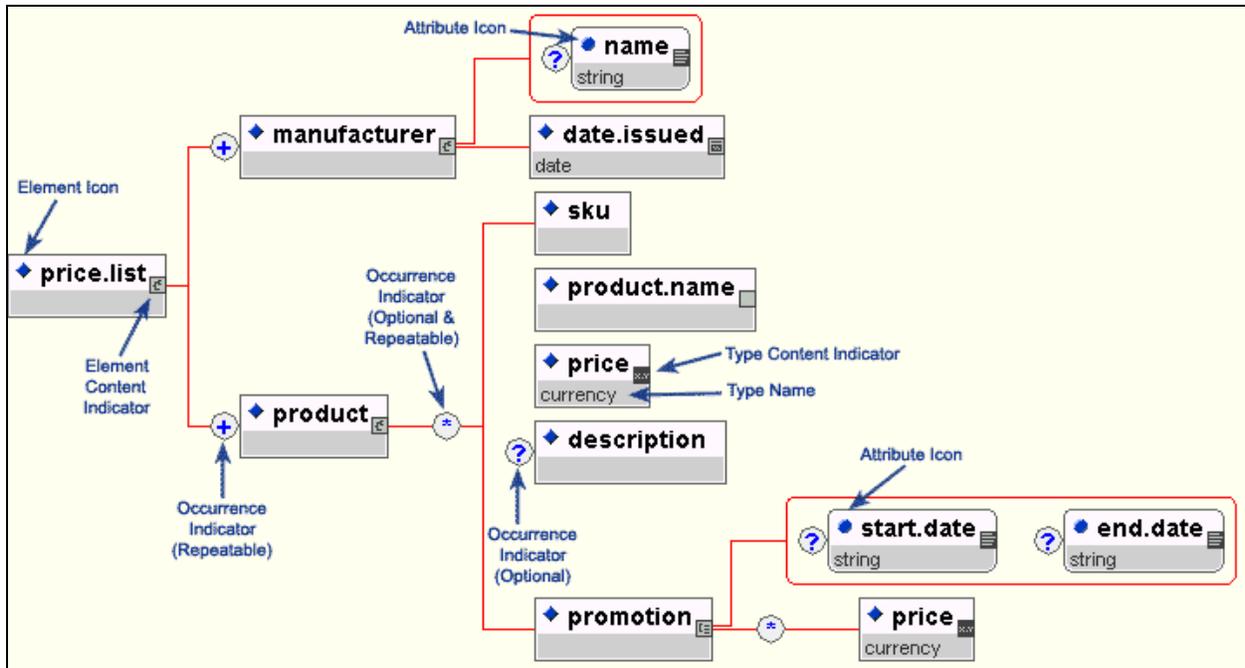

Many societies are coming together into web community portals around a single medical specialty. Within each community, a user may belong to one or more professional medical societies. The Professional Profile reflects this view of membership: an individual may be a member of multiple organizations.

Documentation Conventions

This document uses the following conventions.

Documentation Conventions	
Convention	Description
monospaced type	Sample XML tags, code, schema, or portion thereof
BoldText	When used with an XML tag name, indicates that the element contains sub-elements
<i>Italicized Text</i>	When used in an XML tag description, an attribute of the XML tag.
Tag description	Shading indicated that the tag is further described in another part of the document or in another specifications document

The following graphical standards are used for the XML diagrams in this document.

Graphical Standards from TIBCO's Turbo XML, Copyright TIBCO Software Inc.

Data Elements

The Professional Profile schema includes the following data elements. In most cases, these elements contain subelements.

1. Members
2. Member
3. UniqueID
4. Name
5. Address
6. EducationInfo
7. TrainingInfo
8. CertificationInfo
9. LicenseInfo
10. DisciplinaryInfo
11. AcademicAppointmentInfo
12. OccupationInfo
13. PersonalInfo
14. MembershipInfo
15. XtensibleInfo

The root element is Members.

Other Schema Referenced

This Professional Profile schema imports and refers to the MedBiquitous Name Schema and the MedBiquitous Address Schema. Both are available from the MedBiquitous XML Repository at <http://www.medbiq.org/repository>.

Professional Profile schemas are also available online at:
<http://ns.medbiq.org/member/v1/member.zip>

Professional Profile XML Schema Grammar

The following sections explain the Professional Profile XML Schema grammar. Values in **bold** under XML Tags column indicate that the element has sub-elements.

The XML schema is available online at <http://ns.medbiq.org/member/v1/>.

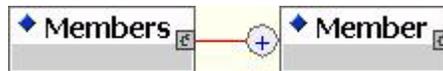

Datatypes not otherwise defined in the document, such as date, refer to datatypes defined within the XML 1.0 technical specification. For information on these datatypes, see the W3C Extensible Markup Language (XML) 1.0 (Fourth Edition).

All the elements having sub-elements will be defined in separate sections. All elements without sub-elements will be defined within the appropriate element sections that use them.

1 Members

Members is the root element. It contains professional profile information for one or more members of a community. Members must occur once within a professional profile.

Members has the sub-element Member, which describes professional profile information for a single person.

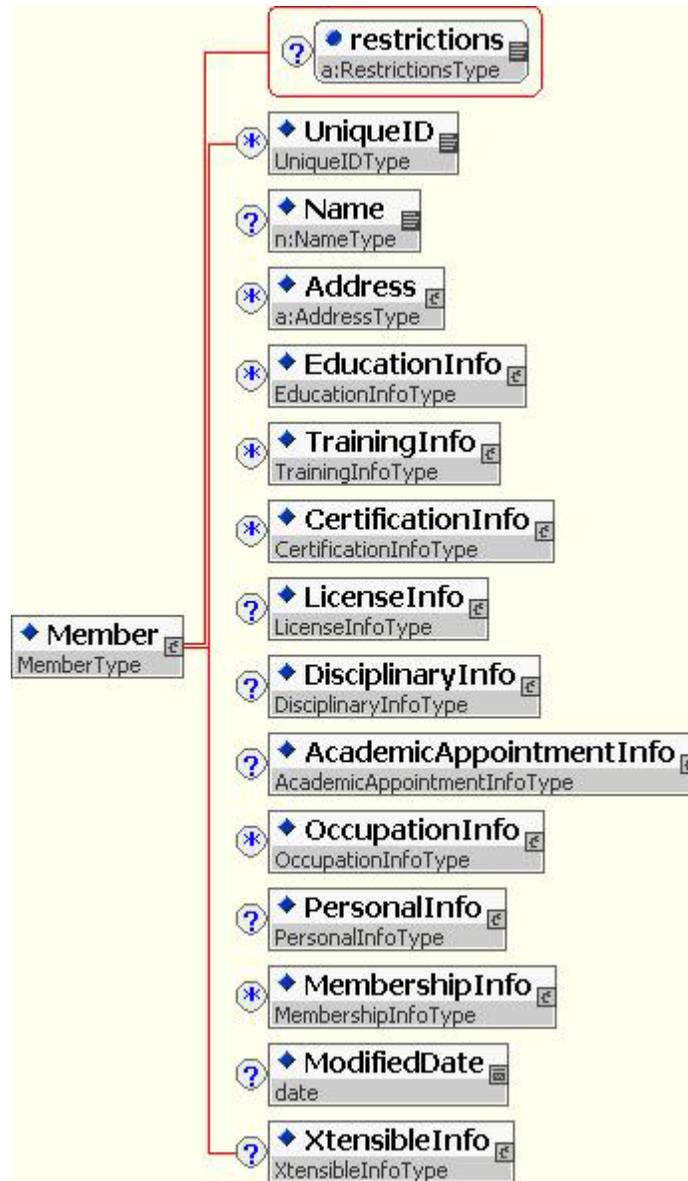

Example:

```
<Members>
  <Member>
    ...
  </Member>
  <Member>
    ...
  </Member>
</Members>
```

2 Member

Member is the subelement of Members that contains all member profile information elements for a single user within a community. Member must occur at least once within a member profile.

Member has a series of sub-elements that are defined in this document.

Member Information

Element	Description	Required	Multiplicity	Datatype
Member	Member is the subelement of Members. It contains sub-elements that define profile information for a single user or healthcare professional within a community. Member has the following attribute: <i>restrictions</i> Indicates whether this member record is to be	Required	1 or more	Container

Element	Description	Required	Multiplicity	Datatype
	<p>unrestricted, restricted, or confidential when sharing information with partner organizations or the general public. Valid values are: Unrestricted, Restricted, Confidential.</p> <p>Unrestricted indicates that a piece of data may be shared or published.</p> <p>Restricted indicates that a piece of data may be shared in some instances, but not published. Policies must be defined surrounding the use of restricted data.</p> <p>Confidential indicates that a piece of data may not be shared or published.</p>			
UniqueID	<p>UniqueID is the subelement of Member. It defines a unique alphanumeric identifier for the member.</p> <p>UniqueID has the following attribute:</p> <p><i>domain</i> Defines the community, society, or organization that is the source of the unique id. Use of the domain attribute is required when using the UniqueID element.</p>	Optional	0 or more	Non-null String
Name	<p>Name is the subelement of Member. Name contains elements that define a person's name in detail. For more information, see the MedBiquitous Name Specifications and Description Document.</p>	Required	1	Container
Address	<p>Address is the subelement of Member. Address contains elements that define an address in detail. For more information, see the MedBiquitous Address Specifications and Description Document.</p>	Optional	0 or more	Container
EducationInfo	<p>EducationInfo is the</p>	Optional	0 or more	Container

Element	Description	Required	Multiplicity	Datatype
	subelement of Member. EducationInfo contains elements that define the educational background for a member, including bachelor's degree and medical degree. See section EducationInfo for more information.			
TrainingInfo	TrainingInfo is the subelement of Member. TrainingInfo contains elements that define a medical professional's post-graduate training, including residency and fellowship. See section TrainingInfo for more information.	Optional	0 or more	Container
CertificationInfo	CertificationInfo is the subelement of Member. CertificationInfo contains elements that define a medical professional's certification from a medical specialty board, such as the American Board of Internal Medicine. See section CertificationInfo for more information.	Optional	0 or more	Container
LicenseInfo	LicenseInfo is the subelement of Member. LicenseInfo contains elements that describe the professional licenses held by an individual. See section LicenseInfo for more information.	Optional	0 or 1	Container
DisciplinaryInfo	DisciplinaryInfo is the subelement of Member. DisciplinaryInfo contains elements that describe any licensing board actions or notices for an individual. See section DisciplinaryInfo for more information.	Optional	0 or 1	Container
AcademicAppointmentInfo	AcademicAppointmentInfo is the subelement of Member. AcademicAppointmentInfo contains elements that describe any academic appointments. See section AcademicAppointmentInfo for more information.	Optional	0 or 1	Container

Element	Description	Required	Multiplicity	Datatype
OccupationInfo	OccupationInfo is the subelement of Member. OccupationInfo contains elements that define a medical professional's occupation. See section OccupationInfo for more information.	Optional	0 or more	Container
PersonallInfo	PersonallInfo is the subelement of Member. PersonallInfo contains elements that define personal information about a member. See section PersonallInfo for more information.	Optional	0 or 1	Container
MembershipInfo	MembershipInfo is the subelement of Member. MembershipInfo contains elements that define a user's membership in professional medical societies and related organizations. See section MembershipInfo for more information.	Optional	0 or more	Container
ModifiedDate	ModifiedDate is the subelement of Member and defines the date that this member record was last updated.	Optional	0 or 1	Date
XtensibleInfo	XtensibleInfo is the subelement of Member. XtensibleInfo contains subelements defined by the organization implementing the schema. See section XtensibleInfo for more information.	Optional	0 or 1	Container

Example:

```

<Member restrictions = "Unrestricted">
  <UniqueID domain = "American College of Surgeons">21556222</UniqueID>
  <Name>

3 EducationInfo

The EducationInfo element defines the educational background for a user, including bachelor's degree and medical degree. This element breaks educational information into more detail. EducationInfo is a sub-element of Member.

EducationInfo Element Information

Element	Description	Required	Multiplicity	Datatype
EducationInfo	This is the sub-element of the root element Member. This element has sub-elements that define the user's degrees and certifications.	Optional	0 or more	Container
Degree	<p>This is the sub-element of the EducationInfo element. It defines the degree received. For example, Bachelor of Arts, MD. This is not a controlled list.</p> <p>This element provides the following attributes:</p> <p><i>discipline</i> Defines the academic discipline for the degree received. For example, Engineering, Chemistry, etc.</p>	Optional	0 or 1	Non-null String
Certificate	<p>This is the sub-element of the EducationInfo element. It defines the certificate received. For example, Perfusionist. This is not a controlled list.</p> <p>This element provides the following attributes:</p> <p><i>type</i> Defines the type of certificate. For example, Professional, HighSchool, etc.</p>	Optional	0 or 1	Non-null String
InstitutionInfo	This is the sub-element of the EducationInfo element. This element has sub-elements that define the certificate or degree-granting institution in detail. See section InstitutionInfo for more information.	Optional	0 or 1	Container
Distinction	This is the sub-element of the EducationInfo element. This element defines any distinctions received. For example, CumLaude, Honors, etc.	Optional	0 or 1	Non-null String
EducationStatus	This is the sub-element of the EducationInfo element. It defines that status of the individual in relation to the educational program. Valid values include: Active, Graduated, Leave of Absence, Withdrawn, Dismissed, and Deceased.	Optional	0 or 1	Restricted

Element	Description	Required	Multiplicity	Datatype
StartDate	<p>This is the sub-element of the EducationInfo element and defines the date the user started this degree or certificate program.</p> <p>StartDate has the following attribute:</p> <p><i>accuracy</i> defines which parts of a date are accurate. Valid values are: DayMonthYear, MonthYear, and Year.</p>	Optional	0 or 1	Date
EndDate	<p>This is the sub-element of the EducationInfo element and defines the date the user completed or ended this degree or certificate program.</p> <p>EndDate has the following attribute:</p> <p><i>accuracy</i> defines which parts of a date are accurate. Valid values are: DayMonthYear, MonthYear, and Year.</p>	Optional	0 or 1	Date
GraduationDate	<p>This is the sub-element of the EducationInfo element and defines the individual's scheduled graduation date for this degree or certificate program.</p> <p>GraduationDate has the following attribute:</p> <p><i>accuracy</i> defines which parts of a date are accurate. Valid values are: DayMonthYear, MonthYear, and Year.</p>	Optional	0 or 1	Date

Example:

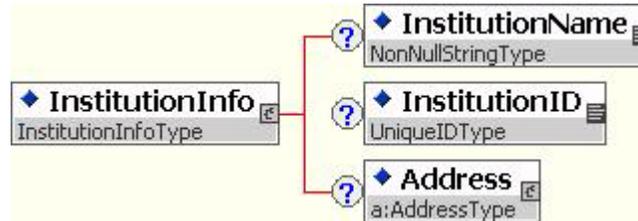

```

<EducationInfo>
  <Degree>M.D.</Degree>
  <InstitutionInfo>
    <InstitutionName>Johns Hopkins University</InstitutionName>
  </InstitutionInfo>
  <EducationStatus>Withdrawn</EducationStatus>
  <StartDate>1980-08-01</StartDate>
  <EndDate>1982-07-31</EndDate>
  <GraduationDate>1984-07-31</GraduationDate>
</EducationInfo>

```

3.1 InstitutionInfo

The InstitutionInfo element defines the name and address for a medical or educational institution. This element breaks institution information into more detail. InstitutionInfo is a sub-element of EducationInfo and ProgramInfo.

InstitutionInfo Element Information

Element	Description	Required	Multiplicity	Datatype
InstitutionInfo	This is the sub-element of the EducationInfo and ProgramInfo elements. It contains elements that define an institution's name and address.	Optional	0 or 1	Container
InstitutionName	This is the sub-element of the InstitutionInfo element. It defines the name of a medical or educational institution. For example, Johns Hopkins School of Medicine.	Optional	0 or 1	Non-null String
InstitutionID	This is the sub-element of the InstitutionInfo element. It defines a unique alphanumeric identifier for the institution. This element has one attribute: <i>domain</i> Defines defines the organization that is the source of the unique identifier.	Optional	0 or 1	Non-null string
Address	This is the sub-element of the InstitutionInfo element. It defines the institution address. See the MedBiquitous Address Specifications and Description Document for more information.	Optional	0 or 1	Container

Example:

```

<InstitutionInfo>
  <InstitutionName>
    Johns Hopkins University School of Medicine
  </InstitutionName>
  <InstitutionID domain="AAMC">133</InstitutionID>
  <Address>
    <a:StreetAddressLine>720 Rutland Avenue</a:StreetAddressLine>
    <a:City>Baltimore</a:City>
    <a:StateOrProvince>MD</a:StateOrProvince>
    <a:PostalCode>21205</a:PostalCode>
    <a:Country>
      <a:CountryCode>US</a:CountryCode>
    </a:Country>
  </Address>
</InstitutionInfo>

```

4 TrainingInfo

The TrainingInfo element defines a medical professional's post-graduate training, including residency and fellowship. This element breaks training information into more detail. TrainingInfo is a sub-element of Member.

TrainingInfo Element Information

Elements	Description	Required	Multiplicity	Datatype
TrainingInfo	This is the sub-element of the root element Member. This element has sub-elements that define the user's post-graduate training.	Optional	0 or more	Container
ProgramInfo	This is the sub-element of the TrainingInfo element. This element has sub-elements that define the post-graduate program in detail.	Optional	0 or 1	Container

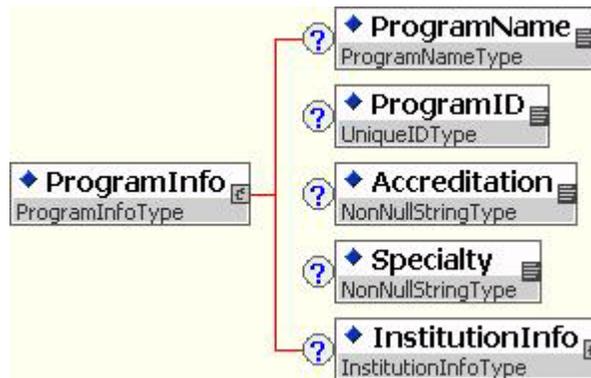

Elements	Description	Required	Multiplicity	Datatype
	See the ProgramInfo Section for more information.			
Distinction	This is the sub-element of the TrainingInfo element. Distinction defines any distinctions received. For example, ChiefResident, etc.	Optional	0 or 1	Non-null String
TrainingStatus	This is the sub-element of the TrainingInfo element. It defines the individual's status within the training program. Valid values include: Year X (where X is a valid digit), Completed Preliminary Training, Completed Specialty Training, Leave of Absence, Withdrawn, Dismissed, and Deceased.	Optional	0 or 1	Restricted
StartDate	This is the sub-element of the TrainingInfo element and defines the date the user started this training program. StartDate has the following attribute: <i>accuracy</i> defines which parts of a date are accurate. Valid values are: DayMonthYear, MonthYear, and Year.	Optional	0 or 1	Date
EndDate	This is the sub-element of the TrainingInfo element and defines the date the individual completed or ended this training program. EndDate has the following attribute: <i>accuracy</i> defines which parts of a date are accurate. Valid values are: DayMonthYear, MonthYear, and Year.	Optional	0 or 1	Date
CompletionDate	This is the sub-element of the TrainingInfo element and defines the individual's completion date for this training program. CompletionDate has the following attribute: <i>accuracy</i> defines which parts of a date are accurate. Valid values are: DayMonthYear, MonthYear, and Year.	Optional	0 or 1	Date

Example:

```
<TrainingInfo>
  <ProgramInfo>
    <ProgramName>
      Stanford-Kaiser Emergency Medicine Residency Program
    </ProgramName>
  </ProgramInfo>
  <Distinction>Chief Resident</Distinction>
  <TrainingStatus>Completed Specialty Training</TrainingStatus>
  <StartDate>1990-08-01</StartDate>
  <EndDate>1993-07-31</EndDate>
  <CompletionDate>1993-07-31</CompletionDate>
</TrainingInfo>
```

4.1 ProgramInfo

The ProgramInfo element contains sub-elements that define detailed information about a post-graduate medical program, including name, accreditation, medical specialty, and institution. ProgramInfo is a sub-element of TrainingInfo.

ProgramInfo Element Information

Element	Description	Required	Multiplicity	Datatype
ProgramInfo	This is the sub-element of the TrainingInfo element. It contains sub-elements that define detailed information about a post-graduate medical program.	Optional	0 or more	Container
ProgramName	This is the sub-element of the ProgramInfo element. This element defines the name of the post-graduate program. For example, Johns Hopkins Emergency Medicine Residency Program. This element provides the following attribute:	Optional	0 or 1	Non-null String

Element	Description	Required	Multiplicity	Datatype
	<i>type</i> Defines the type of post-graduate program. Possible values are: Residency, Fellowship, Other.			
ProgramID	This is the sub-element of the ProgramInfo element. It defines a unique alphanumeric identifier for the training program. This element has one attribute: <i>domain</i> Defines defines the organization that is the source of the unique identifier.	Optional	0 or 1	Non-null string
Accreditation	This is the sub-element of the ProgramInfo element and defines the accrediting organization for this program. For example, ACGME.	Optional	0 or 1	Non-null String
Specialty	This is the sub-element of the ProgramInfo element and defines the medical specialty of the program. For example, Cardiology.	Optional	0 or 1	Non-null String
InstitutionInfo	This is the sub-element of the ProgramInfo element. This element has sub-elements that define the certificate or degree-granting institution in detail. See section InstitutionInfo for more information.	Optional	0 or 1	Container

Example:

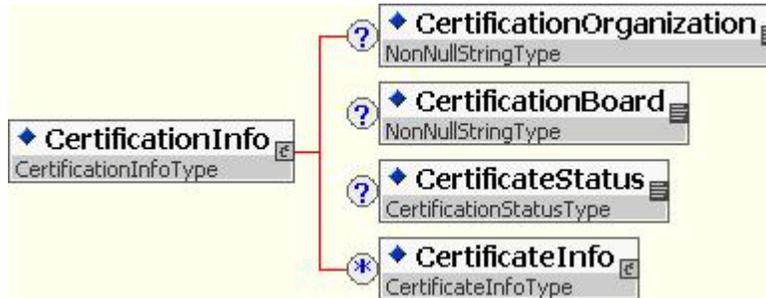

```

<ProgramInfo>
  <ProgramName>Stanford-Kaiser Emergency Medicine Residency Program
</ProgramName>
  <Accreditation>ACGME</Accreditation>
  <Specialty>Emergency Medicine</Specialty>
  <InstitutionInfo
    <InstitutionName>Stanford School of Medicine</InstitutionName>
    <Address>
      <a:StreetAddressLine>300 Pasteur Drive</a:StreetAddressLine>
      <a:City>Stanford</a:City>
      <a:StateOrProvince>CA</a:StateOrProvince>
      <a:PostalCode>94305</a:PostalCode>
      <a:Country>
        <a:CountryCode>US</a:CountryCode>
      </a:Country>
    </Address>
  </InstitutionInfo>
</ProgramInfo>

```

5 CertificationInfo

The CertificationInfo element defines a medical professional's certification from a medical specialty board, such as the American Board of Internal Medicine. This element breaks certification information into more detail. CertificationInfo is a sub-element of Member.

CertificationInfo Element Information

Elements	Description	Required	Multiplicity	Datatype
CertificationInfo	This is the sub-element of Member. This element has sub-elements that define the user's medical specialty certification.	Optional	0 or more	Container
CertificationOrganization	This is the sub-element of CertificationInfo. CertificationOrganization defines the organization certifying the certification board. For example, American Board of Medical Specialties.	Optional	0 or 1	Non-null String
CertificationBoard	This is the sub-element of CertificationInfo. CertificationBoard defines the board certifying the medical professional. For example, American Board of Pediatrics.	Optional	0 or 1	Non-null String
CertificateStatus	This subelement of CertificationInfo identifies the current status of the individual's specialty certification. Valid values are: Active, Inactive, Expired, Revoked, Suspended, and Surrendered.	Optional	0 or 1	Restricted

Elements	Description	Required	Multiplicity	Datatype
CertificateInfo	This is the sub-element of CertificationInfo. CertificateInfo contains subelements that define a particular certification held by the medical professional.	Optional	0 or more	Container

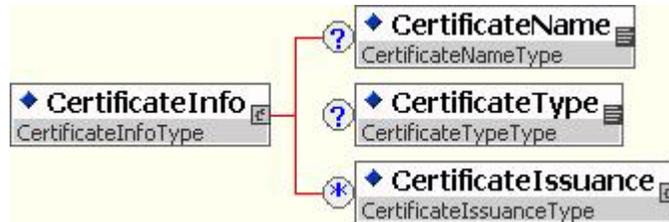

Example:

```

<CertificationInfo>
  <CertificationOrganization>
    American Board of Medical Specialties
  </CertificationOrganization>
  <CertificationBoard>American Board of Surgery</CertificationBoard>
  <CertificateStatus>Active</CertificateStatus>
  <CertificateInfo>
    . . .
  </CertificateInfo>
  <CertificateInfo>
    . . .
  </CertificateInfo>
</CertificationInfo>
    
```

5.1 CertificateInfo

CertificateInfo contains subelements that define a particular certification held by the medical professional. For example, Internal Medicine or Geriatric Medicine are both certifications issued by the American Board of Internal Medicine.

CertificateInfo Element Information

Elements	Description	Required	Multiplicity	Datatype
CertificateInfo	CertificateInfo contains subelements that define a particular certification held by the medical professional.	Optional	0 or more	Container

Elements	Description	Required	Multiplicity	Datatype
CertificateName	<p>This is the sub-element of the CertificationInfo element and defines the name of the certificate. For example, General Surgery.</p> <p>CertificateName has the following attribute:</p> <p><i>CertificateID</i> defines the identifier for a type of certificate issued by a specific specialty board. For example, the Sports Medicine Certificate issued by the American Board of Family Practice has a unique identifier distinct from the identifier for the Sport Medicine Certificate issued by the American Board of Emergency Medicine. The Certificate ID is assigned by the Certification Organization, for example, the American Board of Medical Specialties.</p>	Optional	0 or 1	Non-null String
CertificateType	<p>This subelement of CertificationInfo defines the type of certificate. Valid values are: General Certificate, Subcertificate.</p>	Optional	0 or 1	Restricted
CertificateIssuance	<p>This is the subelement of CertificationInfo. CertificateIssuance contains elements that define a specific issuance of a certification.</p>	Optional	0 or more	Container

Example:

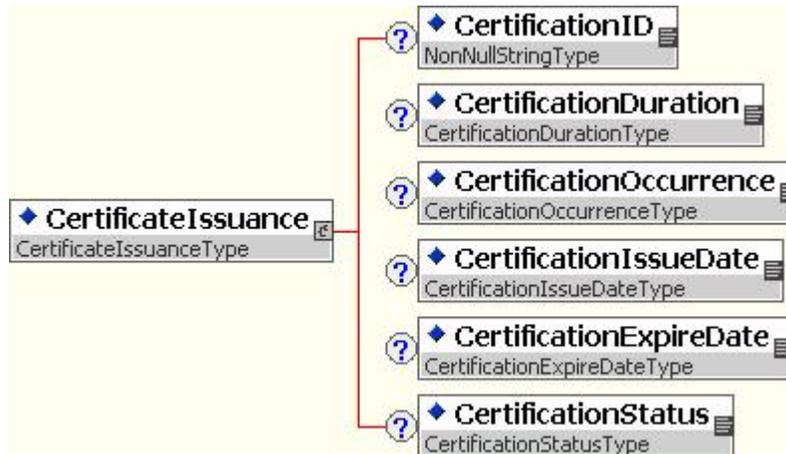

```

<CertificateInfo>
  <CertificateName certificateID = "44444">
    General Surgery
  </CertificateName>
  <CertificateType>General Certificate</CertificateType>
  <CertificateIssuance>
    .
    .
    .
  </CertificateIssuance>
  <CertificateIssuance>
    .
    .
    .
  </CertificateIssuance>
</CertificateInfo>

```

5.2 CertificateIssuance

CertificateIssuance provides details about specific issuances of a certification. For example, an internist will receive multiple certificates from the American Board of Internal Medicine over the course of his or her career in accordance with the Board's Maintenance of Certification program.

CertificateIssuance Element Information

Elements	Description	Required	Multiplicity	Datatype
CertificateIssuance	This is the subelement of CertificateInfo. CertificateIssuance contains elements that define a specific issuance of certifications for the certificate defined by CertificateName. A physician may have several certifications in the same field, including their initial certifications and recertifications.	Optional	0 or more	Container
CertificationID	This sub-element of CertificateIssuance. CertificationID defines a unique identifier for a specific issuance of a certificate. For example, John Doe's initial certification in ophthalmology would have one certification ID; his recertification in ophthalmology would have a different certification ID.	Optional	0 or 1	Non-null String
CertificationDuration	This is the sub-element of the CertificateIssuance element and defines the duration of the certificate. Valid values include: Lifetime, Time-	Optional	0 or 1	Restricted

Elements	Description	Required	Multiplicity	Datatype
	limited.			
CertificationOccurrence	This is the sub-element of the CertificateIssuance element. This element describes whether the certificate is an initial certificate or one issued through a recertification process. Valid values are: Initial, Recertification, and Maintenance of Certification.	Optional	0 or 1	Restricted
CertificationIssueDate	This is the sub-element of the CertificateIssuance element and specifies the date the certificate was issued. CertificationIssueDate has the following attribute: <i>accuracy</i> defines which parts of a date are accurate. Valid values are: DayMonthYear, MonthYear, and Year.	Optional	0 or 1	Date
CertificationExpireDate	This is the sub-element of the CertificateIssuance element and specifies the date the certificate will expire. CertificationExpireDate has the following attribute: <i>accuracy</i> defines which parts of a date are accurate. Valid values are: DayMonthYear, MonthYear, and Year.	Optional	0 or 1	Date
CertificationStatus	CertificationStatus is the subelement of CertificateIssuance and defines whether or not a certification is active. Valid values are Active, Inactive, Expired, Revoked, Suspended, and Surrendered.	Optional	0 or 1	Restricted

Example:

```

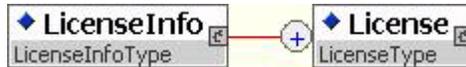

<CertificateIssuance>
  <CertificationID>55555555</CertificationID>
  <CertificationDuration>Time-limited</CertificationDuration>
  <CertificationOccurrence>Recertification</CertificationOccurrence>
  <CertificationIssueDate>1998-12-31</CertificationIssueDate>
  <CertificationExpireDate>2008-12-31</CertificationExpireDate>

```

```
<CertificationStatus>Active</CertificationStatus>
</CertificateIssuance>
```

6 LicenseInfo

The LicenseInfo element describes the professional licenses held by a healthcare professional. This element contains other elements that provide details on each license held. LicenseInfo is a subelement of Member.

LicenseInfo Element Information

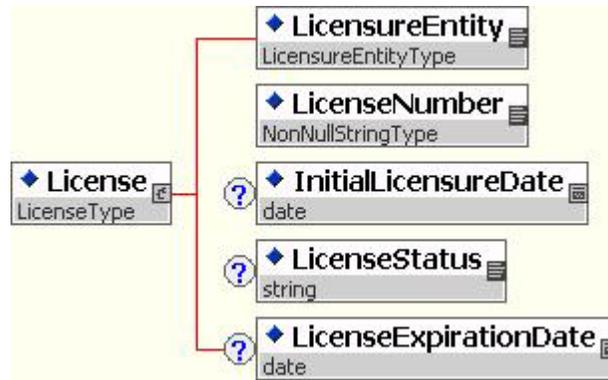

Elements	Description	Required	Multiplicity	Datatype
LicenseInfo	This is the subelement of Member. LicenseInfo contains elements that describe the professional licenses held by a healthcare professional.	Optional	0 or more	Container
License	This is the subelement of LicenseInfo. License contains subelements that describe a health professions license issued by a government board. For information, see section License.	Required	1 or more	Container

Example:

```
<LicenseInfo>
  <License>
    <LicensureEntity code = "MD01">
      Maryland Board of Physicians
    </LicensureEntity>
    <LicenseNumber>12345654123</LicenseNumber>
    <LicenseStatus>Active</LicenseStatus>
  </License>
</LicenseInfo>
```

6.1 License

License describes a health professions license issued by a government board.

License Element Information

Elements	Description	Required	Multiplicity	Datatype
License	This is the subelement of LicenseInfo. License contains subelements that describe a health professions license issued by a government board.	Yes	1 or more	Container
LicensureEntity	This is the subelement of License. LicensureEntity defines the government entity issuing the license. LicensureEntity has the following attributes: <i>code</i> A code defining the licensure entity. <i>domain</i> Defines the community, society, or organization that is the source of the code.	Yes	1	Non-null String
LicenseNumber	This is the subelement of License. LicenseNumber is the alphanumeric string that identifies this issuance of the license.	Yes	1	Non-null String
InitialLicensureDate	This is the subelement of License. InitialLicensureDate defines the date that this individual was initially licensed by this licensing entity.	No	0 or 1	Date
LicenseStatus	This is the subelement of License. LicenseStatus defines the current status of the license. For example, Active, Inactive.	No	0 or 1	Non null string

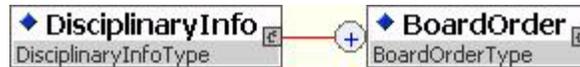

Elements	Description	Required	Multiplicity	Datatype
LicenseExpirationDate	This is the subelement of License. LicenseExpirationDate defines the date the current license will expire.	No	0 or 1	Date

Example:

```
<License>
  <LicensureEntity code = "MD01">
    Maryland Board of Physicians
  </LicensureEntity>
  <LicenseNumber>12345654123</LicenseNumber>
  <InitialLicensureDate>1995-06-30</InitialLicensureDate>
  <LicenseStatus>Active</LicenseStatus>
  <LicenseExpirationDate>2010-06-30</LicenseExpirationDate>
</License>
```

7 DisciplinaryInfo

The DisciplinaryInfo element describes any disciplinary actions or notices for the healthcare professional issued by a licensing board. DisciplinaryInfo contains subelements that describe this information in detail. DisciplinaryInfo is a subelement of Member.

DisciplinaryInfo Element Information

Elements	Description	Required	Multiplicity	Datatype
DisciplinaryInfo	DisciplinaryInfo is the subelement of Member. DisciplinaryInfo contains elements that describe any licensing board actions or notices for an individual.	No	0 or 1	Container
BoardOrder	BoardOrder is the subelement of DisciplinaryInfo. BoardOrder contains detailed information about a board notice or action. See section BoardOrder for more information.	Yes	1 or more	Date

Example:

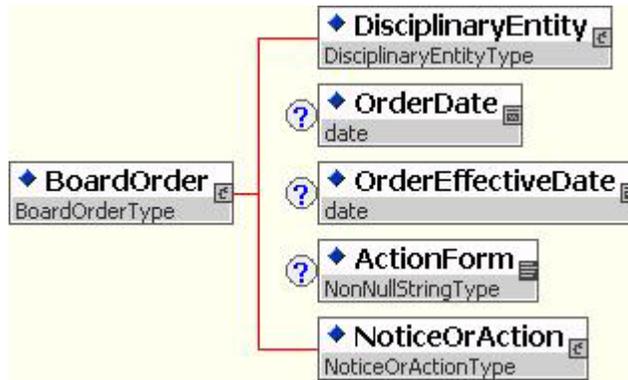

```
<DisciplinaryInfo>
  <BoardOrder>
    ...
```

```

</BoardOrder>
<BoardOrder>
  ...
</BoardOrder>
</DisciplinaryInfo>
    
```

7.1 BoardOrder

BoardOrder describes a board notice or disciplinary action in detail.

BoardOrder Element Information

Elements	Description	Required	Multiplicity	Datatype
BoardOrder	BoardOrder is the subelement of DisciplinaryInfo. BoardOrder contains detailed information about a board notice or action.	Yes	1 or more	Container
DisciplinaryEntity	DisciplinaryEntity is the subelement of BoardOrder. It contains subelements that define the entity issuing the board notice or action. For more information, see the section DisciplinaryEntity.	Yes	1	Container
OrderDate	The date the order was issued. OrderDate is the subelement of BoardOrder.	No	0 or 1	Date
OrderEffectiveDate	The date the order is effective. OrderEffectiveDate OrderDate is the subelement of BoardOrder.	No	0 or 1	Date
ActionForm	The type of legal form constituting the notice or action. For example: Affidavit, Death notice, etc. ActionForm is the subelement	No	0 or 1	Non null string

Elements	Description	Required	Multiplicity	Datatype
	of BoardOrder.			
NoticeOrAction	NoticeOrAction is the subelement of BoardOrder. It contains elements that define a notice or action in detail. For more information, see the section NoticeOrAction.	Yes	1	Container

Example:

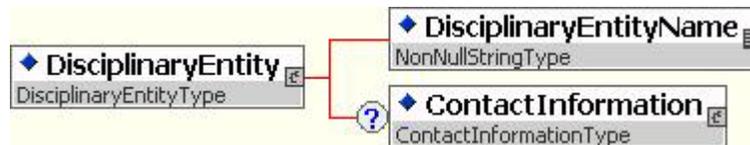

```

<BoardOrder>
  <DisciplinaryEntity>
    <DisciplinaryEntityName code = "PA01">Pennsylvania State Board
of Medicine</DisciplinaryEntityName>
  </DisciplinaryEntity>
  <OrderDate>2005-10-15</OrderDate>
  <ActionForm>Death notice</ActionForm>
  <NoticeOrAction>
    <BoardNotice>
      <NoticeDescription>Deceased</NoticeDescription>
      <DeathDate>2005-10-05</DeathDate>
    </BoardNotice>
  </NoticeOrAction>
</BoardOrder>

```

7.2 DisciplinaryEntity

DisciplinaryEntity describes the disciplinary entity in detail.

DisciplinaryEntity Element Information

Elements	Description	Required	Multiplicity	Datatype
DisciplinaryEntity	DisciplinaryEntity is the subelement of BoardOrder. It contains subelements that define the entity issuing the board notice or action.	Yes	1	Container
DisciplinaryEntityName	<p>Name is a subelement of DisciplinaryEntity. It defines the name of the entity issuing the board notice or action.</p> <p>Name has the following attribute:</p> <p><i>code</i> A code identifying the disciplinary entity.</p> <p><i>domain</i> Defines the community, society, or organization that is the source of the code.</p>	Yes	1	Non null string

Elements	Description	Required	Multiplicity	Datatype
ContactInformation	ContactInformation is the subelement of DisciplinaryEntity. It provides detailed contact information for the disciplinary entity. For more information, see section ContactInformation.	No	0 to 1	Container

Example:

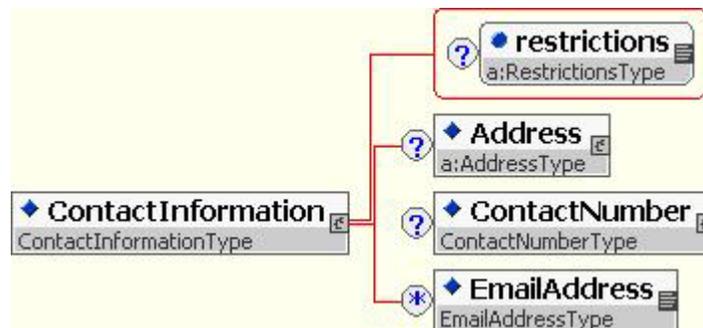

```

<DisciplinaryEntity>
  <DisciplinaryEntityName code = "PA01">
    Pennsylvania State Board of Medicine
  </DisciplinaryEntityName>
  <ContactInformation>
    <Address>
      <StreetAddressLine>
        2601 North 3rd Street
      </StreetAddressLine>
      <City>Harrisburg</City>
      <StateOrProvince>PA</StateOrProvince>
    </Address>
  </ContactInformation>
</DisciplinaryEntity>

```

7.3 ContactInformation

ContactInformation provides detailed contact information for the disciplinary entity.

ContactInformation Element Information

Elements	Description	Required	Multiplicity	Datatype
ContactInformation	<p>ContactInformation is the subelement of DisciplinaryEntity. It provides detailed contact information for the disciplinary entity.</p> <p>ContactInformation has the following attribute:</p> <p><i>restrictions</i> Indicates whether contact information is to be unrestricted, restricted, or confidential when sharing information with partner organizations or the general public. Valid values are: Unrestricted, Restricted, Confidential.</p> <p>Unrestricted indicates that a piece of data may be shared or published.</p> <p>Restricted indicates that a piece of data may be shared in some instances, but not published. Policies must be defined surrounding the use of restricted data.</p> <p>Confidential indicates that a piece of data may not be shared or published.</p>	No	0 or 1	Container
Address	Address is the subelement of ContactInformation. Address contains elements that define an address in detail. For more information, see the MedBiquitous Address Specifications and Description Document.	No	0 or 1	Container
ContactNumber	ContactNumber is the subelement of PersonallInfo. ContactNumber contains elements that define a person's telephone, fax, and pager numbers. For more information, see section ContactNumber.	No	0 or 1	Container

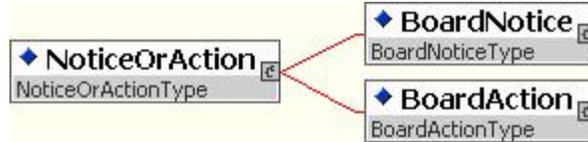

Elements	Description	Required	Multiplicity	Datatype
EmailAddress	<p>This element is the sub-element of the ContactInformation element. EmailAddress defines a person's email address.</p> <p>Email addresses must conform with the IETF RFC 2822 standard. For example:</p> <p>pshelley@nosuchmail.com</p> <p>Percy Shelley <pshelley@nosuchmail.com></p> <p>EmailAddress has one attribute:</p> <p><i>restrictions</i></p> <p>Indicates whether this email address is to be unrestricted, restricted, or confidential when sharing information with partner organizations or the general public. Valid values are: Unrestricted, Restricted, Confidential.</p> <p>Unrestricted indicates that a piece of data may be shared or published.</p> <p>Restricted indicates that a piece of data may be shared in some instances, but not published. Policies must be defined surrounding the use of restricted data.</p> <p>Confidential indicates that a piece of data may not be shared or published.</p>	Optional	0 or more	Email address (string@string.string or string<string@string.string>)

Example:

```
<ContactInformation>
  <Address>
    <a:StreetAddressLine> 2601 North 3rd Street</a:StreetAddressLine>
    <a:City>Harrisburg</a:City>
    <a:StateOrProvince>PA</a:StateOrProvince>
    <a:Country>
      <a:CountryCode>US</a:CountryCode>
    </a:Country>
  </Address>
  <ContactNumber>
    <CountryCode>1</CountryCode>
    <TelephoneNumber>7177871212</TelephoneNumber>
    <Description>Office</Description>
  </ContactNumber>
  <EmailAddress>ST-MEDICINE@state.pa.us</EmailAddress>
</ContactInformation>
```

7.4 NoticeOrAction

NoticeOrAction contains subelements that describe a board notice or disciplinary action.

NoticeOrAction Element Information

Elements	Description	Required	Multiplicity	Datatype
NoticeOrAction	NoticeOrAction is the subelement of BoardOrder. It contains elements that define a notice or action in detail.	Yes	1	Container
BoardNotice	BoardNotice is the subelement of NoticeOrAction. Its subelements define a board notice in detail. For more information, see section BoardNotice.	Either BoardNotice or BoardAction is required	0 or 1	Container
BoardAction	BoardAction is the subelement of NoticeOrAction. Its subelements define a board action in detail. For more information, see section BoardAction.	Either BoardNotice or BoardAction is required	0 or 1	Container

Example:

```

<NoticeOrAction>
  <BoardNotice>
    ...
  </BoardNotice>
</NoticeOrAction>
  
```

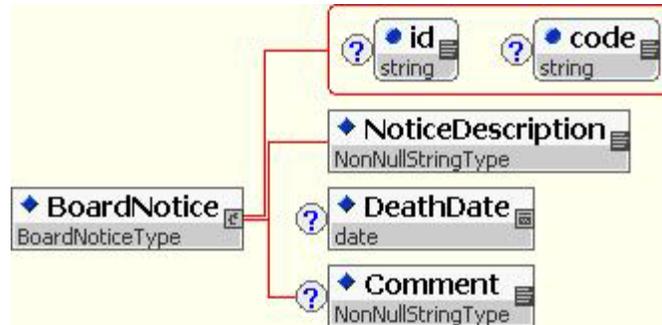

Or:

```

<NoticeOrAction>
  <BoardAction>
    ...
  </BoardAction>
</NoticeOrAction>
  
```

7.5 BoardNotice

BoardNotice provides a detailed description of a board notice.

BoardNotice Element Information

Elements	Description	Required	Multiplicity	Datatype
BoardNotice	BoardNotice is the subelement of NoticeOrAction. Its subelements define a board notice in detail. BoardNotice has the following attributes: <i>id</i> A unique identifier describing the notice. <i>domain</i> Defines the community, society, or organization that is the source of the id.	Either BoardNotice or BoardAction is required	0 or 1	Container
NoticeDescription	NoticeDescription is the subelement of BoardNotice. It provides a description of the board notice issued.	Yes	1	Non null string
DeathDate	DeathDate is the subelement of BoardNotice. It provides the date of death indicated on the board notice, if applicable.	No	0 or 1	Date
Comment	Comment is the subelement of BoardNotice. It provides additional commentary on the notice.	No	0 or 1	Non null string

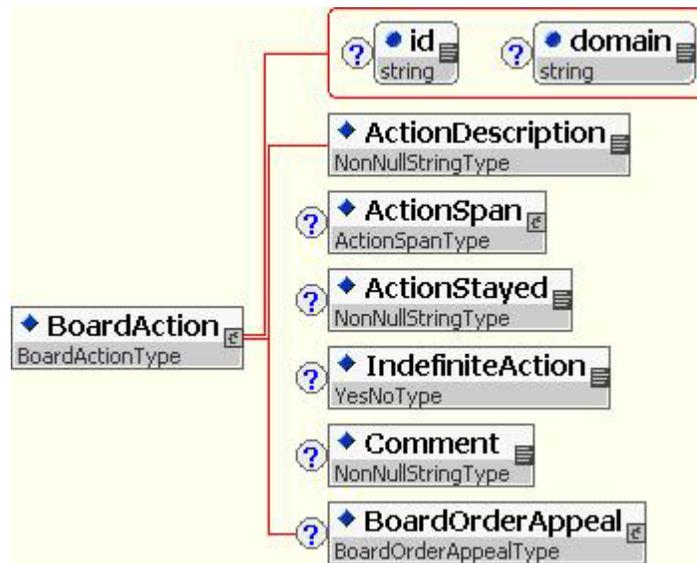

Example:

```

<NoticeOrAction>
  <BoardNotice>
    <NoticeDescription>Deceased</NoticeDescription>
    <DeathDate>2005-10-05</DeathDate>
  </BoardNotice>
</NoticeOrAction>
    
```

7.6 BoardAction

BoardAction has subelements that describe a disciplinary action in detail.

BoardAction Element Information

Elements	Description	Required	Multiplicity	Datatype
BoardAction	BoardAction is the subelement of NoticeOrAction. Its subelements define a board action in detail. BoardAction has the following attributes: <i>id</i> A unique identifier describing the action. <i>domain</i> Defines the community, society, or organization that is the source of the code.	Either BoardNotice or BoardAction is required	0 or 1	Container

Elements	Description	Required	Multiplicity	Datatype
ActionDescription	ActionDescription is the subelement of BoardNotice. It provides a description of the board action issued.	Yes	1	Non null string
ActionSpan	ActionSpan is a subelement of BoardAction. It defines the effective dates or term of the action. For more information, see section ActionSpan.	No	1	Container
ActionStayed	ActionStayed is a subelement of BoardAction. It indicates whether the action has been stayed.	No	0 or 1	Non null string (change to non null in schema)
IndefiniteAction	IndefiniteAction is a subelement of BoardAction. It indicates whether the action has been deemed indefinite.	No	0 or 1	Restricted (Yes or No)
Comment	Comment is the subelement of BoardAction. It provides additional commentary on the action.	No	0 or 1	Non null string
BoardOrderAppeal	BoardOrderAppeal is the subelement of BoardAction. It contains subelements that define any appeals proceeding brought against the action. For more information, see section BoardOrderAppeal.	No	0 or 1	Container

Example:

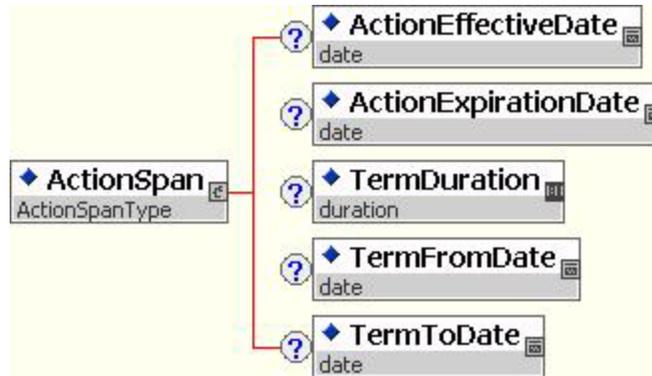

```

<BoardAction>
  <ActionDescription>
    License suspended based on felony drug conviction.
  </ActionDescription>
  <ActionSpan>
    <ActionEffectiveDate>2005-11-30</ActionEffectiveDate>
    <ActionExpirationDate>2015-11-30</ActionExpirationDate>
  </ActionSpan>
</BoardAction>

```

7.7 ActionSpan

ActionSpan defines the effective dates or term of a disciplinary action.

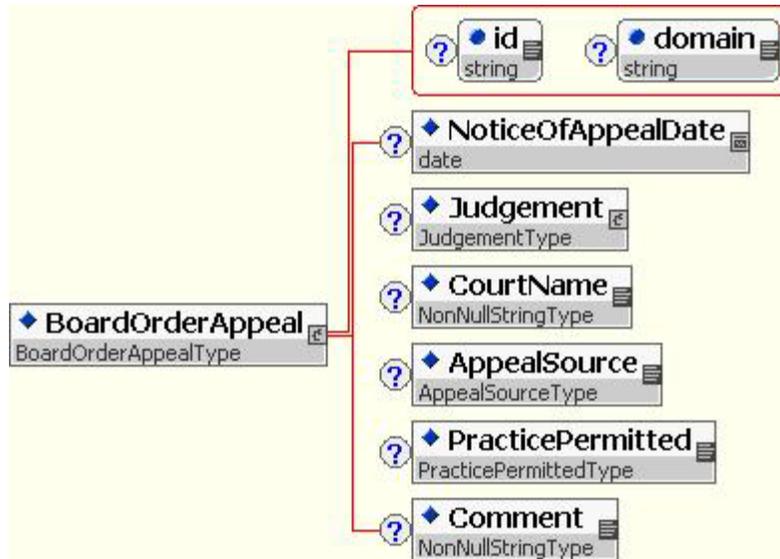

ActionSpan Element Information

Elements	Description	Required	Multiplicity	Datatype
ActionSpan	ActionSpan is a subelement of BoardAction. It defines the effective dates or term of the action.	Yes	1	Container
ActionEffectiveDate	ActionEffectiveDate is a subelement of Expiration. It defines the date the action is effective.	Yes	1	Date
ActionExpirationDate	ActionExpirationDate is a subelement of Expiration. It defines the date the action expires.	Yes	1	Date
TermDuration	TermDuration is the subelement of Term. It defines the duration of the action term.	Yes	1	Duration
TermFromDate	TermFromDate is the subelement of Term. It defines the date the term of the action begins.	Yes	1	Date
TermToDate	TermToDate is the subelement of Term. It defines the date the term of the action ends.	Yes	1	Date

Example:

```
<ActionSpan>
  <TermDuration>P10Y</TermDuration>
  <TermFromDate>2006-04-15</TermFromDate>
  <TermToDate>2016-04-14</TermToDate>
</ActionSpan>
```

7.8 BoardOrderAppeal

BoardOrderAppeal Element Information

Elements	Description	Required	Multiplicity	Datatype
BoardOrderAppeal	BoardOrderAppeal is the subelement of BoardAction. It contains subelements that define any appeals proceeding brought against the action. <i>id</i> A unique identifier describing the appeal. <i>domain</i> Defines the community, society, or organization that is the source of the code.	No	0 or 1	Container
NoticeOfAppealDate	NoticeOfAppealDate is the subelement of BoardOrderAppeal. It indicates the date of the appeal notice.	No	0 or 1	Date

Elements	Description	Required	Multiplicity	Datatype
Judgement	Judgement is the subelement of BoardOrderAppeal. It contains subelements that provide detailed information about the appeal judgement. For more information, see section Judgement.	No	0 or 1	Container
CourtName	CourtName is the subelement of BoardOrderAppeal. It indicates the name of the court hearing the appeal and providing the judgement.	No	0 or 1	Non null string
AppealSource	<p>AppealSource is the subelement of BoardOrderAppeal. It indicates the source of the appeal.</p> <p>AppealSource has the following attribute:</p> <p><i>code</i> A code defining the type of entity appealing the action.</p> <p><i>domain</i> Defines the community, society, or organization that is the source of the code.</p>	No	0 or 1	Non null string
PracticePermitted	<p>PracticePermitted is the subelement of BoardOrderAppeal. It indicates whether the individual is permitted to practice under the terms of the appeal.</p> <p><i>code</i> A code defining the type of practice permitted.</p> <p><i>domain</i> Defines the community, society, or organization that is the source of the code.</p>	No	0 or 1	Non null string
Comment	Comment is the subelement of BoardOrderAppeal. It provides additional commentary on the appeal.	No	0 or 1	Non null string

Example:

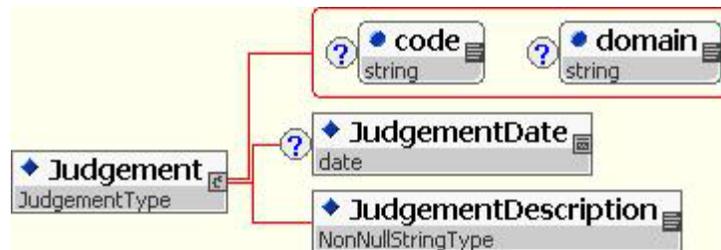

```

<BoardOrderAppeal>
  <NoticeOfAppealDate>2005-10-15</NoticeOfAppealDate>
  <Judgement>
    <JudgementDate>2005-10-15</JudgementDate>
    <JudgementDescription>
      Physician was assessed a civil penalty of $1,000 for
      failing to submit proof of continuing medical education.
    </JudgementDescription>
  </Judgement>
  <CourtName>Pennsylvania Circuit Court</CourtName>
  <AppealSource>State Board of Medicine</AppealSource>
  <PracticePermitted>
    Practice is permitted upon payment of the penalty.
  </PracticePermitted>
</BoardOrderAppeal>

```

7.9 Judgement

Judgement provides detailed information about the appeal judgement.

Judgement Element Information

Elements	Description	Required	Multiplicity	Datatype
Judgement	Judgement is the subelement of BoardOrderAppeal. It contains subelements that provide detailed information about the appeal judgement. <i>code</i> A code defining the type of judgement. <i>domain</i> Defines the community, society, or organization that is the source of the code.	No	0 or 1	Container
JudgementDate	JudgementDate is the subelement of Judgement. It provides the date of the judgement.	No	0 or 1	Date

Elements	Description	Required	Multiplicity	Datatype
JudgementDescription	JudgementDescription is the subelement of Judgement. It provides a text description of the judgement.	Yes	0 or 1	Non null string

Example:

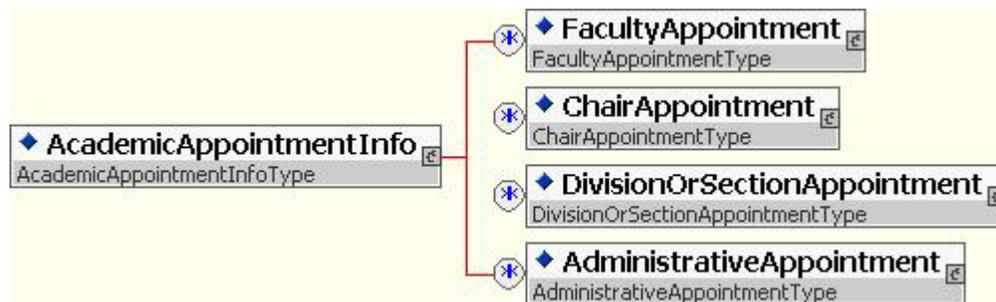

```

<Judgement>
  <JudgementDate>2005-10-15</JudgementDate>
  <JudgementDescription>
    Physician was assessed a civil penalty of $1,000 for failing
    to submit proof of continuing medical education.
  </JudgementDescription>
</Judgement>

```

8 AcademicAppointmentInfo

The AcademicAppointmentInfo element defines any academic appointments held by a healthcare professional. It provides detailed information about academic appointments. Academic appointments may also be described using OccupationInfo (particularly if the academic position is the individual's primary occupation), but OccupationInfo provides a less detailed description. An appointment may be described using both AcademicAppointmentInfo and OccupationInfo if desired.

AcademicAppointmentInfo Element Information

Elements	Description	Required	Multiplicity	Datatype
AcademicAppointmentInfo	AcademicAppointmentInfo is the subelement of Member. AcademicAppointmentInfo contains elements that describe any academic appointments held by an individual.	No	0 or 1	Container

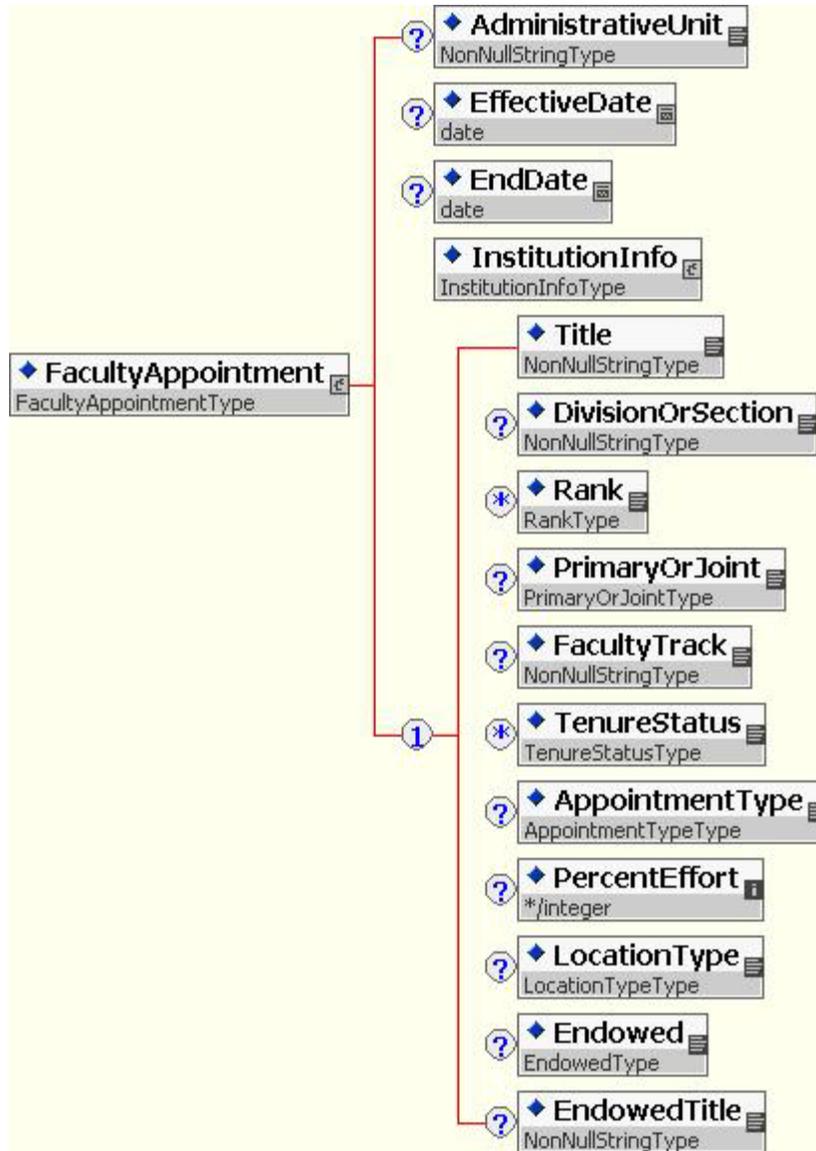

Elements	Description	Required	Multiplicity	Datatype
FacultyAppointment	FacultyAppointment is the subelement of AcademicAppointmentInfo. It contains subelements that describe an individual's faculty appointments in detail. For more information, see section FacultyAppointment.	No	0 or more	Container
ChairAppointment	ChairAppointment is the subelement of AcademicAppointmentInfo. It contains subelements that describe an individual's appointment as chair of a department or chief of a division or section in detail. For more information, see section ChairAppointment.	No	0 or more	Container
DivisionOrSectionAppointment	DivisionOrSectionAppointment is the subelement of AcademicAppointmentInfo. It contains subelements that describe an individual's appointment within a division or section of an academic department in detail. For more information, see section DivisionOrSectionAppointment.	No	0 or more	Container
AdministrativeAppointment	AdministrativeAppointment is the subelement of AcademicAppointmentInfo. It contains subelements that describe an individual's administrative appointment within a school, hospital, or Veterans Administration organization in detail. For more information, see section AdministrativeAppointment.	No	0 or more	Container

Example:

```
<AcademicAppointmentInfo>
  <FacultyAppointment>
    ...
  </FacultyAppointment>
  <FacultyAppointment>
    ...
  </FacultyAppointment>
  <ChairAppointment>
    ...
  </ChairAppointment>
  <AdministrativeAppointment>
    ...
  </AdministrativeAppointment>
</AcademicAppointmentInfo>
```

8.1 FacultyAppointment

FacultyAppointment contains subelements that describe a single faculty appointment in detail.

FacultyAppointment Element Information

Elements	Description	Required	Multiplicity	Datatype
FacultyAppointment	FacultyAppointment is the subelement of AcademicAppointmentInfo. It contains subelements that describe a single faculty appointment in detail.	No	0 or more	Container

Elements	Description	Required	Multiplicity	Datatype
AdministrativeUnit	AdministrativeUnit is the subelement of FacultyAppointment. AdministrativeUnit identifies the academic department for this appointment. For example, Department of Surgery.	No	0 or 1	NonNull String
EffectiveDate	EffectiveDate is the subelement of FacultyAppointment. It defines the start date for this appointment.	No	0 or 1	Date
EndDate	EndDate is the subelement of FacultyAppointment. It defines the end date for this appointment.	No	0 or 1	Date
InsitutionInfo	This element is the subelement of FacultyAppointment. It has subelements that define the institution in detail. See section InstitutionInfo for more information.	Yes	1	Container
Title	Title is the subelement of FacultyAppointment. It defines the official title of the academic appointment at the institution. For example, Professor.	Yes	1	NonNull String
DivisionOrSection	DivisionOrSection is the subelement of FacultyAppointment. It identifies the academic division or section within the department applicable for this appointment. For example, Cardiology.	No	0 or 1	NonNull String
Rank	Rank is the subelement of FacultyAppointment. It defines an academic rank associated with this appointment. The Rank element may be repeated to describe a rank progression related to this appointment. If more than one rank is specified, list the current rank first. Valid values are: Professor, Associate Professor, Assistant Professor, Instructor, Lecturer. Rank has the following attribute: <i>effectiveDate</i> The date the the rank described became effective.	No	0 or 1	Restricted

Elements	Description	Required	Multiplicity	Datatype
PrimaryOrJoint	PrimaryOrJoint is the subelement of FacultyAppointment. It indicates whether the appointment is a primary appointment or joint appointment. Valid values are: Primary, Joint.	No	0 or 1	Restricted
FacultyTrack	FacultyTrack is the subelement of FacultyAppointment. It describes the faculty track for this appointment.	No	0 or 1	NonNull String
TenureStatus	TenureStatus is the subelement of FacultyAppointment. It describes a current or past tenure status of the individual as related to this appointment. The TenureStatus element may be repeated to describe a progression in tenure status related to this appointment. If more than one tenure status is specified, list the current tenure status first. Valid values are: Tenured, Tenure Eligible Track, Not Tenure Eligible Track, Tenure Not Available. TenureStatus has the following attribute: <i>effectiveDate</i> The date the tenure status described became effective.	No	0 or more	Restricted
AppointmentType	AppointmentType is the subelement of FacultyAppointment. It describes the nature of the appointment. Valid values are: Full-time, Part-time, Volunteer, and Emeritus.	No	0 or 1	Restricted
PercentEffort	PercentEffort is the subelement of FacultyAppointment. It describes the percentage of time for appointments that require part-time effort. Valid values are integers between 1 and 100.	No	0 or 1	Integer 1-100
LocationType	LocationType is the subelement of FacultyAppointment. It describes the type of location for this faculty appointment. Valid values are: School-based, Hospital-based, VA-based.	No	0 or 1	Restricted

Elements	Description	Required	Multiplicity	Datatype
Endowed	Endowed is the subelement of FacultyAppointment. Endowed indicates whether or not this appointment is an endowed appointment. Valid Values are Yes and No.	No	0 or 1	Restricted
EndowedTitle	EndowedTitle is the subelement of FacultyAppointment. It defines the title of the endowed appointment. For example, William Stewart Halsted Professor of Surgery.	No	0 or 1	NonNull String

Example:

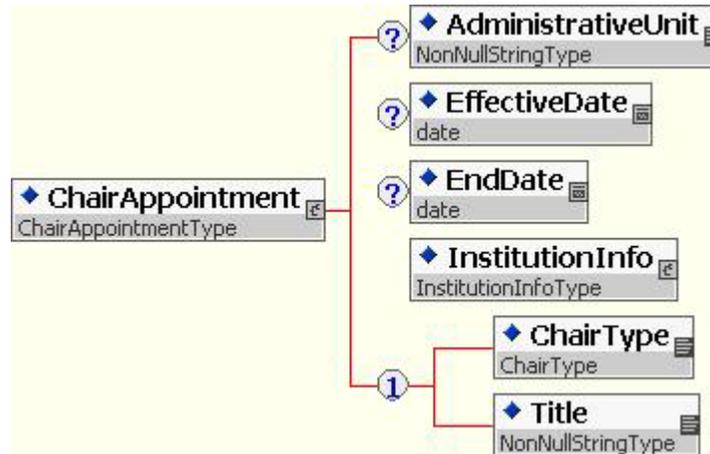

```

<FacultyAppointment>
  <AdministrativeUnit>Department of Surgery</AdministrativeUnit>
  <EffectiveDate>2001-01-30</EffectiveDate>
  <InstitutionInfo>
    <InstitutionName>University of Pittsburgh</InstitutionName>
    <Address>
      <a:City>Pittsburgh</a:City>
      <a:StateOrProvince>Pennsylvania</a:StateOrProvince>
      <a:Country>
        <a:CountryCode>US</a:CountryCode>
      </a:Country>
    </Address>
  </InstitutionInfo>
  <Title>Assistant Professor of Medicine</Title>
  <Rank>Assistant Professor</Rank>
  <PrimaryOrJoint>Primary</PrimaryOrJoint>
  <TenureStatus>Tenure Eligible Track</TenureStatus>
  <AppointmentType>Full-time</AppointmentType>
  <LocationType>School-based</LocationType>
  <Endowed>No</Endowed>
</FacultyAppointment>

```

8.2 ChairAppointment

ChairAppointment describes an individual's appointment as chair of a department or chief of a division or section in detail.

ChairAppointment Element Information

Elements	Description	Required	Multiplicity	Datatype
ChairAppointment	ChairAppointment is the subelement of AcademicAppointmentInfo. It contains subelements that describe an individual's appointment as chair of a department in detail.	No	0 or more	Container
AdministrativeUnit	AdministrativeUnit is the subelement of ChairAppointment. AdministrativeUnit identifies the academic department for this appointment. For example, Department of Surgery.	No	0 or 1	NonNull String
EffectiveDate	EffectiveDate is the subelement of ChairAppointment. It defines the start date for this appointment.	No	0 or 1	Date
EndDate	EndDate is the subelement of ChairAppointment. It defines the end date for this appointment.	No	0 or 1	Date

Elements	Description	Required	Multiplicity	Datatype
InstitutionInfo	This element is the subelement of ChairAppointment. It has sub-elements that define the institution in detail. See section InstitutionInfo for more information.	Yes	1	Container
ChairType	ChairType is the subelement of ChairAppointment. It defines the type of chair appointment held. Valid values are: Chair and Co-chair. ChairType has one attribute: <i>term</i> Indicates the permanence of the term of office. Valid values are: acting, interim, and permanent.	Yes	1	Restricted
Title	Title is the subelement of ChairAppointment. It defines the official title of the appointment at the institution. For example, Chairman, Department of Medicine.	Yes	1	NonNull string

Example:

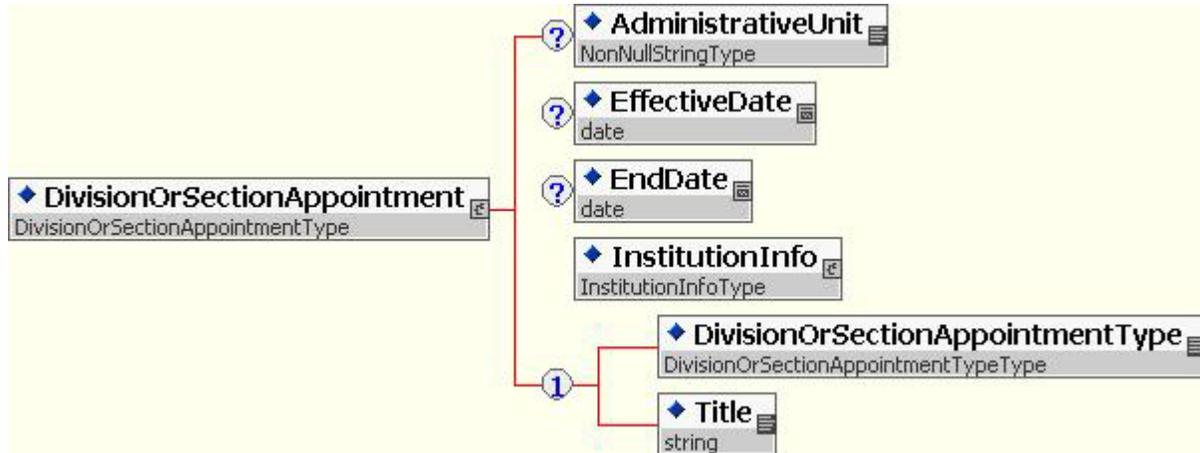

```

<ChairAppointment>
  <AdministrativeUnit>Department of Surgery</AdministrativeUnit>
  <EffectiveDate>2001-01-30</EffectiveDate>
  <InstitutionInfo>
    <InstitutionName>Oregon Health and Science
University</InstitutionName>
    <Address>
      <a:City>Portland</a:City>
      <a:StateOrProvince>Oregon</a:StateOrProvince>
      <a:Country>
        <a:CountryCode>US</a:CountryCode>
      </a:Country>
    </Address>
  </InstitutionInfo>
  <ChairType term="permanent">Chair</ChairType>
  <Title>Chairman, Department of Surgery</Title>
</ChairAppointment>

```

8.3 DivisionOrSectionAppointment

DivisionOrSectionAppointment describe's an individual's appointment within an academic section or division of a department.

DivisionOrSectionAppointment Element Information

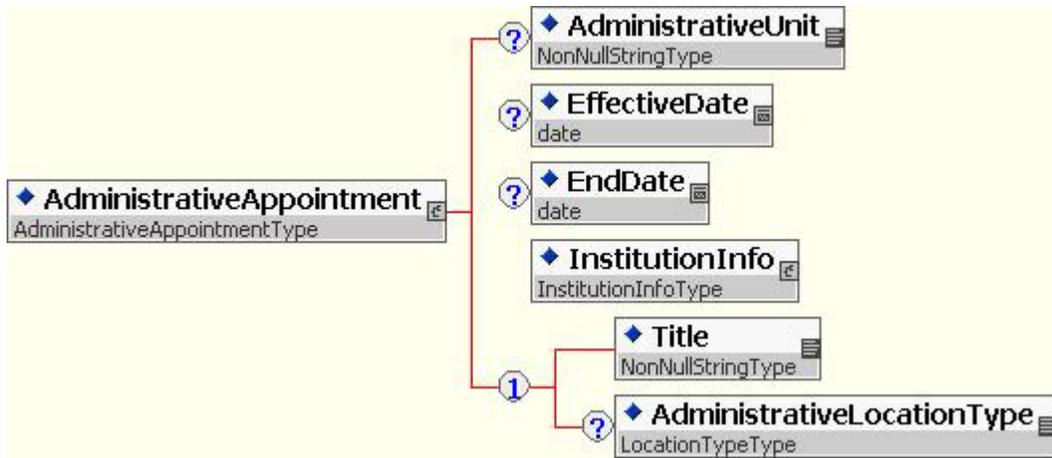

Elements	Description	Required	Multiplicity	Datatype
DivisionOrSectionAppointment	DivisionOrSectionAppointment is the subelement of AcademicAppointmentInfo. It contains subelements that describe an individual's appointment within a division or section of an academic department in detail.	No	0 or more	Container
AdministrativeUnit	AdministrativeUnit is the subelement of DivisionOrSectionAppointment. AdministrativeUnit identifies the academic division or section for this appointment. For example, Neonatology Division.	No	0 or 1	NonNull string
EffectiveDate	EffectiveDate is the subelement of DivisionOrSectionAppointment. It defines the start date for this appointment.	No	0 or 1	Date
EndDate	EndDate is the subelement of DivisionOrSectionAppointment. It defines the end date for this appointment.	No	0 or 1	Date

Elements	Description	Required	Multiplicity	Datatype
InstitutionInfo	This element is the subelement of ChairAppointment. It has sub-elements that define the institution in detail. See section InstitutionInfo for more information.	Yes	1	Container
DivisionOrSectionAppointmentType	DivisionOrSectionAppointmentType is the subelement of DivisionOrSectionAppointment. It defines the type of appointment held. Valid values are: Chief and Co-chief. DivisionOrSectionAppointmentType has one attribute: <i>term</i> Indicates the permanence of the term of office. Valid values are: acting, interim, and permanent.	Yes	1	Restricted
Title	Title is the subelement of DivisionOrSectionAppointment. It defines the official title of the appointment at the institution. For example, Director, Division of Rheumatology.	Yes	1	NonNull string

8.4 AdministrativeAppointment

AdministrativeAppointment describes an individual's administrative appointment within a school, hospital, or Veterans Administration organization in detail.

AdministrativeAppointment is not intended to describe chair of division or section chief appointments. To describe department chair appointments, use the ChairAppointment element. To describe division or section chief appointments, use the DivisionOrSectionAppointment element.

AdministrativeAppointment Element Information

Elements	Description	Required	Multiplicity	Datatype
AdministrativeAppointment	AdministrativeAppointment is the subelement of AcademicAppointmentInfo. It contains subelements that describe an individual's administrative appointment in detail.	No	0 or more	Container
AdministrativeUnit	AdministrativeUnit is the subelement of AdministrativeAppointment. AdministrativeUnit identifies the administrative unit for this appointment. For example, Legal Department.	No	0 or 1	NonNull String
EffectiveDate	EffectiveDate is the subelement of AdministrativeAppointment. It defines the start date for this appointment.	No	0 or 1	Date
EndDate	EndDate is the subelement of AdministrativeAppointment. It defines the end date for this appointment.	No	0 or 1	Date
InstitutionInfo	This element is the subelement of AdministrativeAppointment. It has sub-elements that define the institution in detail. See section InstitutionInfo for more information.	Yes	1	Container

Elements	Description	Required	Multiplicity	Datatype
Title	Title is the subelement of AdministrativeAppointment. It defines the official title of the administrative appointment. For example, Vice Dean.	Yes	1	NonNull String
AdministrativeLocationType	AdministrativeLocationType is the subelement of AdministrativeAppointment. It defines the location of the administrative appointment. Valid values are: School-based, Hospital-based, VA-based.	No	0 or 1	Restricted

Example:

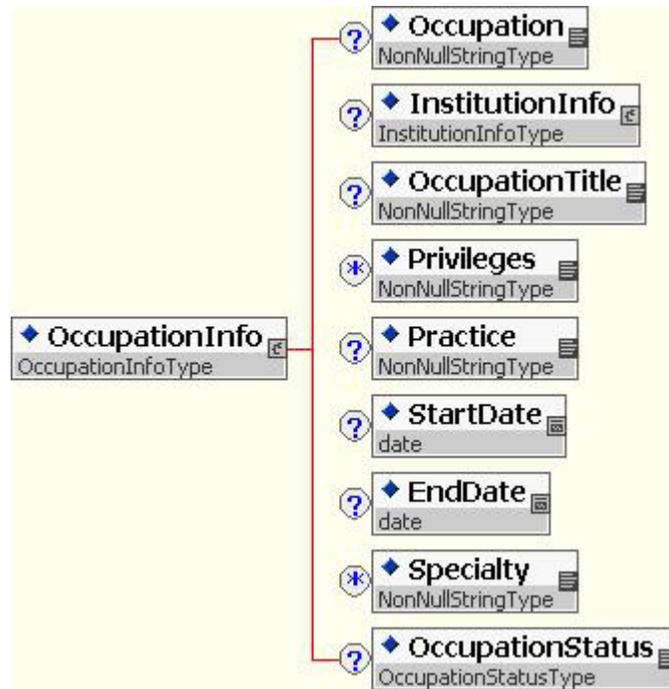

```

<AdministrativeAppointment>
  <AdministrativeUnit>Office of Educational
Affairs</AdministrativeUnit>
  <EffectiveDate>2002-06-30</EffectiveDate>
  <InstitutionInfo>
    <InstitutionName>Tufts University</InstitutionName>
    <Address>
      <a:City>Boston</a:City>
      <a:StateOrProvince>Massachussets</a:StateOrProvince>
      <a:Country>
        <a:CountryCode>US</a:CountryCode>
      </a:Country>
    </Address>
  </InstitutionInfo>
  <Title>Dean for Educational Affairs</Title>
  <AdministrativeAppointmentType>
    School-based
  </AdministrativeAppointmentType>
</AdministrativeAppointment>

```

9 OccupationInfo

The OccupationInfo element defines a medical professional's occupation. This element breaks occupation information into more detailed elements. AcademicAppointmentInfo may also be used to describe an individual's academic appointments in greater detail. An appointment may be described using both AcademicAppointmentInfo and OccupationInfo if desired. OccupationInfo is a sub-element of Member.

OccupationInfo Element Information

Elements	Description	Required	Multiplicity	Datatype
OccupationInfo	This is the sub-element of the Member element. This element has sub-elements that define a user's occupation with specific elements for physician occupations.	Optional	0 or more	Container
Occupation	This is the sub-element of the OccupationInfo element. This element defines a user's occupation as a free-format text field.	Optional	0 or 1	Non-null string
InstitutionInfo	This is the sub-element of the OccupationInfo element. This element has sub-elements that define the user's institution in detail. See section InstitutionInfo for more information.	Optional	0 or 1	Container
OccupationTitle	This is the sub-element of the OccupationInfo element. It defines the user's official title within the institution or practice.	Optional	0 or 1	Non-null String
Privileges	This is the sub-element of the OccupationInfo element. It defines the privileges that a user has at the institution listed.	Optional	0 or more	Non-null String

Elements	Description	Required	Multiplicity	Datatype
Practice	This is the sub-element of the OccupationInfo element. It defines the name of a medical professional's practice. For example, Doyle Eye Associates.	Optional	0 or 1	Non-null String
StartDate	This is the sub-element of the OccupationInfo element and defines the date the user started working in this practice or institution.	Optional	0 or 1	Date
EndDate	This is the sub-element of the OccupationInfo element and defines the date the user stopped working at this practice or institution.	Optional	0 or 1	Date
Specialty	This is the sub-element of the OccupationInfo element and defines the medical specialty of the user. For example, Cardiology.	Optional	0 or more	Non-null String
OccupationStatus	This is the sub-element of the OccupationDetails element; the status element may occur once and is optional. Valid values are: retired, active.	Optional	0 or 1	Restricted

Example:

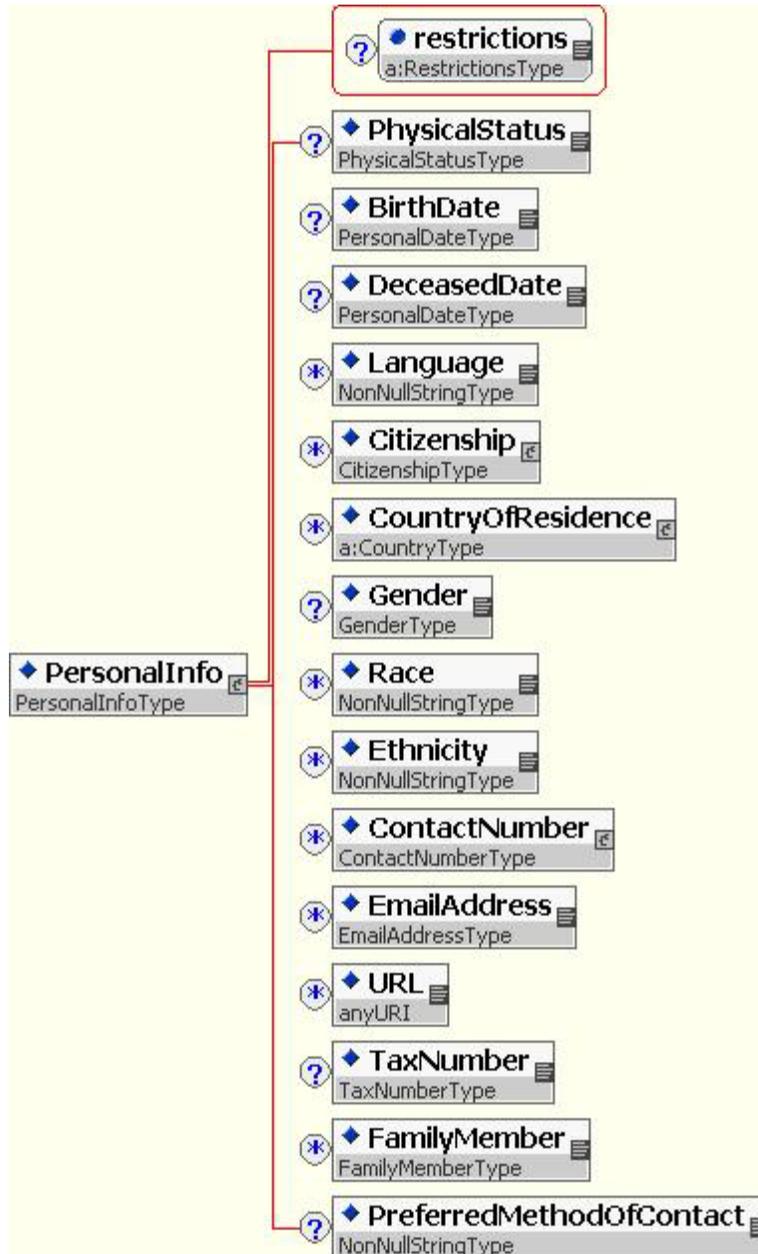

```

<OccupationInfo>
  <Occupation>Family Physician</Occupation>
  <OccupationTitle>Director</OccupationTitle>
  <Practice>Springfield Family Practice</Practice>
  <Specialty>Family Practice</Specialty>
  <OccupationStatus>Active</OccupationStatus>
</OccupationInfo>

```

10 PersonalInfo

The PersonalInfo element defines personal information about a user. This element breaks personal information into more detailed elements. PersonalInfo is a sub-element of Member.

PersonallInfo Element Description

Element	Description	Required	Multiplicity	Datatype
PersonallInfo	<p>The PersonallInfo element has sub-elements to define personal information in detail.</p> <p>PersonallInfo has one attribute:</p> <p><i>restrictions</i> Indicates whether personal information is to be unrestricted, restricted, or confidential when sharing information with partner organizations or the general public. Valid values are: Unrestricted, Restricted, Confidential.</p> <p>Unrestricted indicates that a piece of data may be shared or published.</p> <p>Restricted indicates that a piece of data may be shared in some instances, but not published. Policies must be defined surrounding the use of restricted data.</p> <p>Confidential indicates that a piece of data may not be shared or published.</p>	Optional	0 or 1	Container
PhysicalStatus	<p>This element is a sub-element of PersonallInfo element and defines the physical status of the person. Valid values are: Living, Deceased.</p>	Optional	0 or 1	Restricted

Element	Description	Required	Multiplicity	Datatype
BirthDate	<p>BirthDate is a sub-element of PersonallInfo and defines a person's birth date.</p> <p>BirthDate has the following attributes:</p> <p><i>accuracy</i> defines which parts of a date are accurate. Valid values are: DayMonthYear, MonthYear, and Year.</p> <p><i>restrictions</i> Indicates whether the birth date is to be unrestricted, restricted, or confidential when sharing information with partner organizations or the general public. Valid values are: Unrestricted, Restricted, Confidential.</p> <p>Unrestricted indicates that a piece of data may be shared or published.</p> <p>Restricted indicates that a piece of data may be shared in some instances, but not published. Policies must be defined surrounding the use of restricted data.</p> <p>Confidential indicates that a piece of data may not be shared or published.</p>	Optional	0 or 1	Date

Element	Description	Required	Multiplicity	Datatype
DeceasedDate	<p>DeceasedDate is a sub-element of PersonallInfo and indicates the date of death for the individual.</p> <p>DeceasedDate has the following attributes:</p> <p><i>accuracy</i> defines which parts of a date are accurate. Valid values are: DayMonthYear, MonthYear, and Year.</p> <p><i>restrictions</i> Indicates whether the deceased date is to be unrestricted, restricted, or confidential when sharing information with partner organizations or the general public. Valid values are: Unrestricted, Restricted, Confidential.</p> <p>Unrestricted indicates that a piece of data may be shared or published.</p> <p>Restricted indicates that a piece of data may be shared in some instances, but not published. Policies must be defined surrounding the use of restricted data.</p> <p>Confidential indicates that a piece of data may not be shared or published.</p>	Optional	0 or 1	Date
Language	<p>Language is a sub-element of PersonallInfo and defines a language a person speaks, reads, or writes.</p>	Optional	0 or more	Non-null String

Element	Description	Required	Multiplicity	Datatype
Citizenship	<p>This element is the sub-element of the PersonallInfo element. Citizenship contains subelements that define the nation of citizenship of an individual. Citizenship extends the CountryType datatype, which contains CountryName and CountryCode subelements. See the MedBiquitous Address Specifications and Description Document for more information.</p> <p>Citizenship has one attribute:</p> <p><i>pointInTime</i> Allows the schema to describe citizenship at multiple points in time. Valid values are: entry to medical school, birth, and current.</p>	Optional	0 or more	Container
CountryOfResidence	<p>This element is the sub-element of the PersonallInfo element. CountryofResidence contains elements that describe the country of residence for an individual. CountryofResidence uses the CountryType datatype, which contains CountryName and CountryCode subelements. See the MedBiquitous Address Specifications and Description Document for more information.</p>	Optional	0 or more	Container
Gender	<p>This element is the sub-element of the PersonallInfo element. Gender defines the gender of the person. Valid values are: Male, Female.</p>	Optional	0 or 1	Restricted
Race	<p>This element is the sub-element of the PersonallInfo element. Race defines a population group or classification usually based on physical characteristics.</p>	Optional	0 or more	Non-null string
Ethnicity	<p>This element is the sub-element of the PersonallInfo element. Ethnicity defines a population group based on culture, religion, language, nationality, or race.</p>	Optional	0 or more	Non-null string

Element	Description	Required	Multiplicity	Datatype
ContactNumber	This element is the sub-element of the PersonallInfo element. It contains elements that describe a person's telephone, fax, and pager numbers. See the section ContactNumber for more information.	Optional	0 or more	Container
EmailAddress	<p>This element is the sub-element of the PersonallInfo element. EmailAddress defines a person's email address.</p> <p>Email addresses must conform with the IETF RFC 2822 standard. For example:</p> <p>pshelley@nosuchmail.com</p> <p>Percy Shelley <pshelley@nosuchmail.com></p> <p>EmailAddress has one attribute:</p> <p><i>restrictions</i> Indicates whether this email address is to be unrestricted, restricted, or confidential when sharing information with partner organizations or the general public. Valid values are: Unrestricted, Restricted, Confidential.</p> <p>Unrestricted indicates that a piece of data may be shared or published.</p> <p>Restricted indicates that a piece of data may be shared in some instances, but not published. Policies must be defined surrounding the use of restricted data.</p> <p>Confidential indicates that a piece of data may not be shared or published.</p>	Optional	0 or more	Email address (string@string.string or string <string@string.string>)
URL	This element is the sub-element of the PersonallInfo element. URL defines the location for a web page or site for this person. For example, http://www.johnsmithmd.com .	Optional	0 or more	URI

Element	Description	Required	Multiplicity	Datatype
TaxNumber	<p>This element is the sub-element of the PersonallInfo element. TaxNumber defines tax number such as social security number, for the individual.</p> <p>TaxNumber has the following attributes:</p> <p><i>type</i> Defines the type of tax number. For example, Social Security Number or Social Insurance Number.</p> <p><i>restrictions</i> Indicates whether the tax number is to be unrestricted, restricted, or confidential when sharing information with partner organizations or the general public. Valid values are: Unrestricted, Restricted, Confidential.</p> <p>Unrestricted indicates that a piece of data may be shared or published.</p> <p>Restricted indicates that a piece of data may be shared in some instances, but not published. Policies must be defined surrounding the use of restricted data.</p> <p>Confidential indicates that a piece of data may not be shared or published.</p>	Optional	0 or 1	Non-null String
FamilyMember	<p>This element is the sub-element of the PersonallInfo element. FamilyMember defines a member of the individual's family.</p> <p><i>relationship</i> Relationship defines the family member's relationship to the individual that is profiled. For example, husband.</p>	Optional	0 or more	Non-null String
PreferredMethodOfContact	<p>This element is the sub-element of the PersonallInfo element. PreferredMethodOfContact defines the preferred method of contact for this individual. For example, cellphone, telephone, fax, pager, email, postal.</p>	Optional	0 or 1	Non-null String

Example:

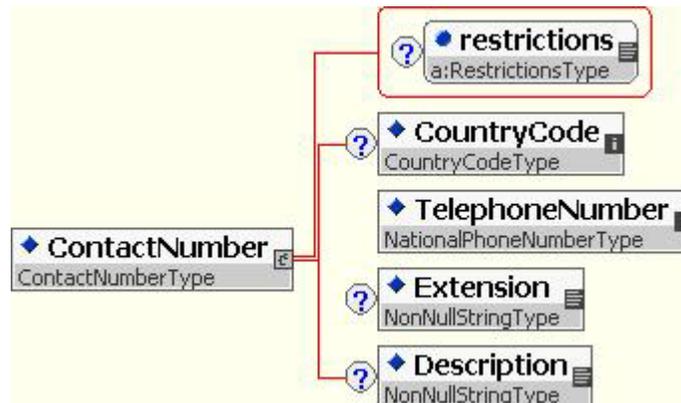

```

<PersonalInfo>
  <PhysicalStatus>Living</PhysicalStatus>
  <BirthDate accuracy="DayMonthYear" restrictions = "Unrestricted" >1960-
12-05</BirthDate>
  <Language>English</Language>
  <Citizenship>
    <a:CountryCode>US</a:CountryCode>
  </Citizenship>
  <Gender>Male</Gender>
  <ContactNumber>
    <CountryCode>1</CountryCode>
    <TelephoneNumber>4105551212</TelephoneNumber>
    <Description>Office</Description>
  </ContactNumber>
  <EmailAddress>pbshelley@nosuchmail.org</EmailAddress>
  <TaxNumber type="Social Security Number" restrictions= "Confidential">
888-88-8888</TaxNumber>
  <PreferredMethodOfContact>email</PreferredMethodOfContact>
</PersonalInfo>

```

10.1 ContactNumber

The ContactNumber element contains subelement that define a person's telephone, fax, and pager numbers. ContactNumber is a subelement of PersonalInfo.

ContactNumber Element Information

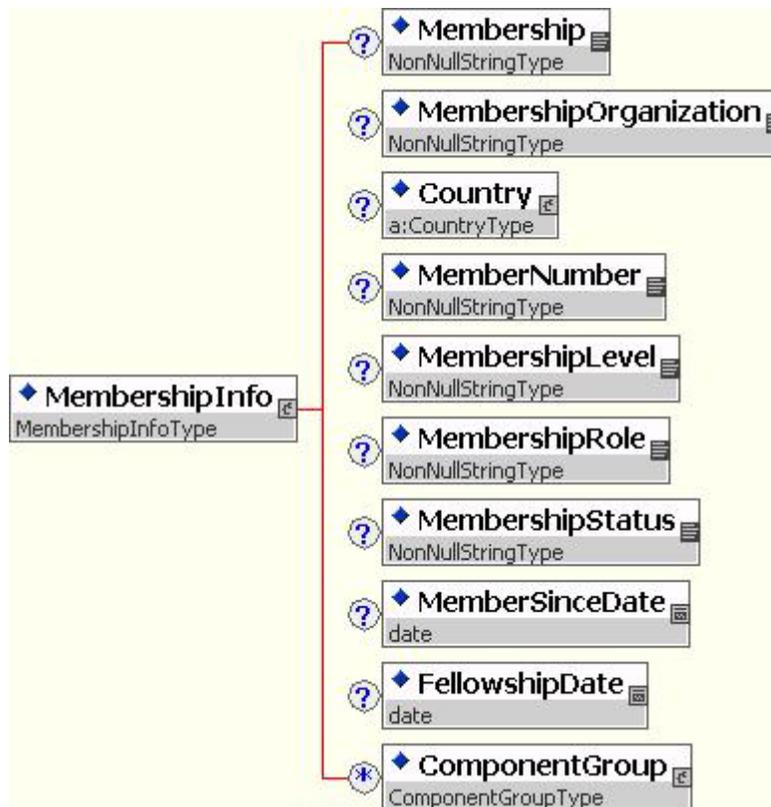

Element	Description	Required	Multiplicity	Datatype
ContactNumber	<p>ContactNumber is the subelement of PersonallInfo. ContactNumber contains elements that define a person's telephone, fax, and pager numbers.</p> <p>ContactNumber has one attribute:</p> <p><i>restrictions</i> Indicates whether this contact number is to be unrestricted, restricted, or confidential when sharing information with partner organizations or the general public. Valid values are: Unrestricted, Restricted, Confidential.</p> <p>Unrestricted indicates that a piece of data may be shared or published.</p> <p>Restricted indicates that a piece of data may be shared in some instances, but not published. Policies must be defined surrounding the use of restricted data.</p> <p>Confidential indicates that a piece of data may not be shared or published.</p>	Optional	0 or more	Container
CountryCode	CountryCode is the subelement of ContactNumber. CountryCode defines the numeric telephone code used to reach telephone numbers within a particular country. For example, 44.	Optional	0 or 1	Integer of up to 3 digits
TelephoneNumber	TelephoneNumber is the subelement of ContactNumber. TelephoneNumber defines a telephone, fax, or pager number, including area or city code.	Required	1	Integer of up to 14 digits
Extension	Extension is the subelement of ContactNumber. Extension defines a telephone extension used to reach an individual.	Optional	0 or 1	Non-null String
Description	Description is a subelement of ContactNumber and defines the type of telephone number. For example, home, business, fax, pager, or mobile.	Optional	0 or 1	Non-null String

Example:

```
<ContactNumber>
  <CountryCode>44</CountryCode>
  <TelephoneNumber>2076115555</TelephoneNumber>
  <Description>Fax</Description>
</ContactNumber>
```

11 MembershipInfo

The MembershipInfo element defines a user's membership in professional medical societies and related organizations. This element breaks membership information into more detailed elements. MembershipInfo is a sub-element of Member.

MembershipInfo Element Information

Element	Description	Required	Multiplicity	Datatype
MembershipInfo	This is the sub-element of the Member element. MembershipInfo has sub-elements that define the user's membership in societies and organizations.	Optional	0 or 1	Container

Element	Description	Required	Multiplicity	Datatype
Membership	This is the sub-element of the MembershipInfo element. Membership defines membership in a single society or organization in a free-format text field.	Optional	0 or 1	Non-null String
MembershipOrganization	This is the sub-element of the MembershipInfo element. MembershipOrganization element defines the name of the organization to which to user belongs. For example, American Academy of Ophthalmology. This element provides the following attribute: <i>OrganizationID</i> Defines a unique, alphanumeric identification for the organization that MedBiquitous Consortium establishes.	Optional	0 or 1	Non-null String
Country	This is the sub-element of the MembershipInfo element and defines the country of the organization. Country uses the CountryType datatype, which contains CountryName and CountryCode subelements. See the MedBiquitous Address Specifications and Description Document for more information.	Optional	0 or 1	Container
MemberNumber	This is the sub-element of the MembershipInfo element. MemberNumber defines the number used by the organization to identify this member.	Optional	0 or 1	Non-null String
MembershipLevel	This is the sub-element of the MembershipInfo element. MembershipLevel defines the membership level of the member. For example, associate, fellow, etc. This element provides the following attributes: <i>code</i> Defines a code that the organization associates with the membership level.	Optional	0 or 1	Non-null String

Element	Description	Required	Multiplicity	Datatype
MembershipRole	This is the sub-element of the MembershipInfo element. MembershipRole defines the member's role in the organization. For example, President, Secretary General, etc.	Optional	0 or 1	Non-null String
MembershipStatus	This is the sub-element of the MembershipInfo element. MembershipStatus defines a user's membership status within the organization. For example, active, inactive, retired, emeritus, life.	Optional	0 or 1	Non-null String
MemberSinceDate	This is the sub-element of the MembershipInfo element. MemberSinceDate defines the date that the member first joined the organization.	Optional	0 or 1	Date
FellowshipDate	This is the sub-element of the MembershipInfo element. FellowshipDate defines the date that the member became a fellow within the organization.	Optional	0 or 1	Date
ComponentGroup	This is the sub-element of the MembershipInfo element. ComponentInfo has sub-elements that define the organization components to which a member belongs. For more information, see section ComponentInfo.	Optional	0 or more	Container

Example:

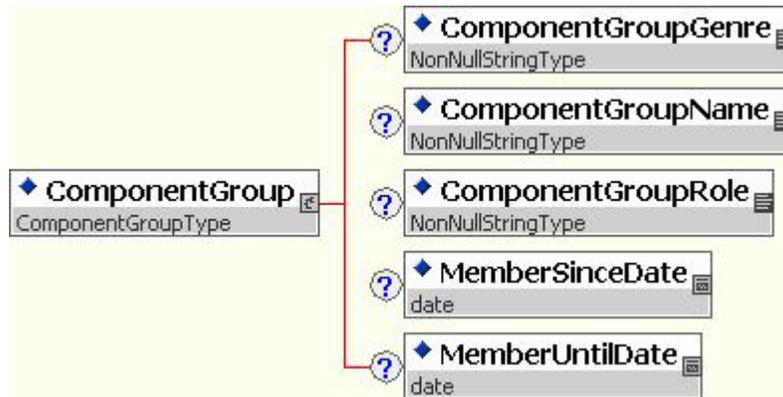

```

<MembershipInfo>
  <MembershipOrganization>
    European Association for Cardio-thoracic Surgery
  </MembershipOrganization>
  <Country>
    <a:CountryName>United Kingdom</a:CountryName>
  </Country>
  <MemberNumber>21077</MemberNumber>
  <MembershipLevel>Member</MembershipLevel>
  <MembershipRole>Secretary General</MembershipRole>
  <MembershipStatus>Active</MembershipStatus>
  <MemberSinceDate>1979-01-01</MemberSinceDate>
</MembershipInfo>

```

11.1 ComponentGroup

The ComponentGroup element contains sub-elements that define a user's membership in chapters, special interest groups, and other components of national and international professional medical societies. ComponentGroup is a sub-element of MembershipInfo.

ComponentInfo Element Information

Element	Description	Required	Multiplicity	Datatype
ComponentGroup	This is the sub-element of the MembershipInfo element. ComponentInfo has sub-elements that define the organization components to which a member belongs.	Optional	0 or more	Container
ComponentGroupGenre	This is the subelement of the ComponentGroup element. ComponentGroupGenre defines the type of component to which the user belongs. For example, Chapter, Special Interest Group, Committee, etc.	Optional	0 or 1	Non-null String
ComponentGroupName	This is the sub-element of the ComponentGroup element. ComponentGroupName defines the name of the organization component to which the user belongs. For example, Belgian Chapter, Annual Meeting Program Committee, etc.	Optional	0 or 1	Non-null String

Element	Description	Required	Multiplicity	Datatype
ComponentGroupRole	This is the sub-element of the ComponentGroup element. ComponentGroupRole defines the member's role in the organization component. For example, Committee Chair, Secretary, etc.	Optional	0 or 1	Non-null String
MemberSinceDate	This is the sub-element of the ComponentGroup element. MemberSinceDate defines the date that the member first joined the organization component.	Optional	0 or 1	Date
MemberUntilDate	This is the sub-element of the ComponentGroup element. MemberUntilDate defines the date that the individual's membership in the organization component expires.	Optional	0 or 1	Date

Example:

```
<ComponentGroup>
  <ComponentGroupGenre>Chapter</ComponentGroupGenre>
  <ComponentGroupName>Minnesota Radiological Society</ComponentGroupName>
  <ComponentGroupRole>President</ComponentGroupRole>
  <MemberSinceDate>1985-01-31</MemberSinceDate>
  <MemberUntilDate>2004-01-30</MemberUntilDate>
</ComponentGroup>
```

12 XtensibleInfo

The XtensibleInfo element contains sub-elements defined by the organization implementing the schema. It extends the currently defined schema. Elements listed in XtensibleInfo may be candidates for inclusion in a revision of the MedBiquitous Healthcare Professional Profile. We encourage submission of these ideas to the MedBiquitous Professional Profile Working Group. The group's home page is located at http://medbiq.org/working_groups/professional_profile/index.html . You can also submit suggestions to info@medbiq.org.

XtensibleInfo is a sub-element of Member.
